

Coop business model - key takeaways

1. Absolute key takeaways

- Coop is primarily a physical grocery retailer with a cooperative/member ownership layer.
- The shared Coop App connects four banners through offers, bonus, Scan & Betal, receipts, shopping lists and games.
- The customer promise mixes price, membership, convenience, locality, quality and responsibility.
- Lobbyco makes Coop's loyalty capability look like a platform/OEM asset, but public revenue impact is not disclosed.
- Online grocery delivery is closed; digital is mainly store-supporting, not e-commerce-led.
- Financial performance improved in 2025, but EBIT remained negative.

2. Key numbers

metric	value	year	source
Net revenue, Coop Danmark A/S	DKK 32.565bn	2025	Coop Danmark A/S årsrapport 2025
Net revenue incl. brugsforeninger	DKK 44.756bn	2025	Coop Danmark A/S årsrapport 2025
Stores, Coop Danmark A/S	536	2025	Coop Danmark A/S årsrapport 2025
Stores incl. brugsforeninger	900	2025	Coop Danmark A/S årsrapport 2025
EBITDA before property gains	DKK 313m	2025	Coop press release / annual report
EBIT	-DKK 215m	2025	Coop press release / annual report
Members	More than 2m	2026	Coop Medlem
Coop app users	More than 1.8m	2026	Lobyco case
Coop app monthly active users	Approx. 880,000	2026	Lobyco insight
Coop app daily users	Above 250,000	2026	Shortcut case

3. What Coop appears to stand for

element	evidence	interpretation
Member ownership	More than 2m members/co-owners; no shareholders claim.	Membership is identity and loyalty, not only discounts.
Local/community	Brugsen local-store language; local boards; weekly member listening.	Coop positions stores as community infrastructure.
Responsible food	Ånglamark 1,200+ products; strict product/chemical claims.	Responsibility is productized through private labels and app insight.
Price/member value	5% fresh produce bonus; Discountmatch; Lav Pris; 365discount.	Coop must also answer a price-sensitive market.
Digital convenience	Scan & Betal, personal offers, receipts, shopping list, games.	Digital strengthens the physical-store relationship.

4. Main strategic tension

Coop appears to have a strong digital customer relationship through the Coop App and Lobbyco. Vendor sources report more than 1.8m app users and about 880,000 monthly active users. But the core of the business is still physical stores and grocery retail economics: 536 Coop Danmark stores, 900 stores including brugsforeninger, and DKK 44.756bn revenue including brugsforeninger in 2025. The closure of Coop.dk MAD in 2023 and Coop.dk webshop in 2025 shows that digital ambition has been narrowed toward store support and loyalty rather than full online grocery commerce. This is an analytical tension, not a recommendation.

apparent business model	value proposition	strategic tension
Store-based grocery retail plus cooperative membership	Price, member value, convenience, locality, quality and responsibility.	Digital platform strength versus physical-store economics and chain
