STRATEGI HANDLER OM POSITIONERING

Porter (1996): 'What Is Strategy?'

- “...strategic positioning means performing different activities from rivals' or performing similar activities in different ways.”
- “Competitive strategy is about being different. It means deliberately choosing a different set of activities to deliver a unique mix of value.”

FORRETNINGSMODELLEN ER FUNDAMENTET FOR VIRKSOMHEDENS STRATEGISKE POSITION

Lektion 3: Strategisk analyse (del II) og digitale forretningsmodeller

1. Introduktion

2. Forretningsmodeller

3. Digitale forretningsmodeller

4. 'Business model canvas'

5. Afslutning

EFTER LEKTION 3 BØR I KUNNE...

- ☐ Definere hvad en forretningsmodel er.
- ☐ Identificere og diskutere virksomheders 'customer value proposition(s)'.
- ☐ Analysere virksomheders digitale strategier ud fra Weils & Woerners (2018) 'Digital Business Model Framework'
- ☐ Analysere virksomheders digitale strategier samt formulere strategiske anbefalinger på baggrund af Osterwalders & Pigneurs (2010) 'business model canvas'.
- ☐ Skelne mellem strategisk analyse på meso og makro niveau.

FORRETNINGSMODELLER**

DEN TRADITIONELLE TILGANG (1)

Johnson et al. (2008): 'Reinventing your business model'

Customer Value Proposition (CVP)

- **Target customer**
- **Job to be done** to solve an important problem or fulfill an important need for the target customer
- **Offering**, which satisfies the problem or fulfills the need. This is defined not only by what is sold but also by how it's sold.

Customer Value Proposition (CVP)

- **Target customer**
- **Job to be done** to solve an important problem or fulfill an important need for the target customer
- **Offering**, which satisfies the problem or fulfills the need. This is defined not only by what is sold but also by how it's sold.

PROFIT FORMULA

- **Revenue model** How much money can be made: price x volume. Volume can be thought of in terms of market size, purchase frequency, ancillary sales, etc.
- **Cost structure** How costs are allocated: includes cost of key assets, direct costs, indirect costs, economies of scale.
- **Margin model** How much each transaction should net to achieve desired profit levels.
- **Resource velocity** How quickly resources need to be used to support target volume. Includes lead times, throughput, inventory turns, asset utilization, and so on.

KEY RESOURCES

needed to deliver the customer value proposition profitably. Might include:

- People
- Technology, products
- Equipment
- Information
- Channels
- Partnerships, alliances
- Brand

KEY PROCESSES, as well as rules, metrics, and norms, that make the profitable delivery of the customer value proposition repeatable and scalable. Might include:

- **Processes:** design, product development, sourcing, manufacturing, marketing, hiring and training, IT
- **Rules and metrics:** margin requirements for investment, credit terms, lead times, supplier terms
- **Norms:** opportunity size needed for investment, approach to customers and channels

TATA NANO: EN STÆRK CUSTOMER VALUE PROPOSITION

“Imagine, for a moment, that you are standing on a Mumbai road on a rainy day. You notice the large number of motor scooters snaking precariously in and out around the cars. As you look more closely, you see that most bear whole families – both parents and several children. Your first thought might be “That’s crazy!” or “That’s the way it is in developing countries – people get by as best they can.” When Ratan Tata of Tata Group looked out over this scene, he saw

a critical job to be done: providing a safer alternative for scooter families. He understood that the cheapest car available in India cost easily five times what a scooter did and that many of these families could not afford one. Offering an affordable, safer, all-weather alternative for scooter families was a powerful value proposition, one with the potential to reach tens of millions of people who were not yet part of the car-buying market.”

Johnson et al., 2008: 54

PROFIT FORMULA

- **Revenue model** How much money can be made: price x volume. Volume can be thought of in terms of market size, purchase frequency, ancillary sales, etc.
- **Cost structure** How costs are allocated: includes cost of key assets, direct costs, indirect costs, economies of scale.
- **Margin model** How much each transaction should net to achieve desired profit levels.
- **Resource velocity** How quickly resources need to be used to support target volume. Includes lead times, throughput, inventory turns, asset utilization, and so on.

TATA NANO: EN FORANDRET 'PROFIT FORMULA'

"Ratan Tata also recognized that Tata Motors' business model could not be used to develop such a product at the needed price point."

"In seeking to build a car for 100,000 rupees, or \$2,500, Tata knew that sufficient profit would be generated through high volume if the company could persuade the

huge number of non-consumers – the scooter families – to buy. That goal required radical changes in the cost structure of making a car. To build the Nano, a team of young engineers developed new processes – outsourcing 85% of the car's components, using 60% fewer vendors, and eventually employing a network of assemblers to build to order."

Johnson et al., 2008: 53-54

DEN TRADITIONELLE TILGANG (3)

Johnson et al. (2008): 'Reinventing your business model'

DEN TRADITIONELLE TILGANG (4)

Johnson et al. (2008): 'Reinventing your business model'

KEY PROCESSES, as well as rules, metrics, and norms, that make the profitable delivery of the customer value proposition repeatable and scalable. Might include:

- **Processes:** design, product development, sourcing, manufacturing, marketing, hiring and training, IT
- **Rules and metrics:** margin requirements for investment, credit terms, lead times, supplier terms
- **Norms:** opportunity size needed for investment, approach to customers and channels

TATA NANO: SVIGTENDE 'KEY RESOURCES' OG 'KEY PROCESSES'

“Tata Motors projected production figures of 250,000 annually at launch. This was not achieved, and various factors led to a decline in sales volume, including delays during the factory relocation from Singur to Sanand, early instances of the Nano catching fire or the perception of the car being unsafe and lacking quality due to cost cutting. Actual sales reached 7,591 for model

year 2016-2017. The project lost money, as confirmed by former Tata Sons chairman Cyrus Mistry and by Tata Motors management. In 2017, Tata Motors said manufacturing would continue due to the company's emotional commitment to the project. Production was eventually halted in May 2018.”

JUSTERINGER VS. EGENTLIG FORNYELSE

Johnson et al. (2008): 'Reinventing your business model'

"...[C]ompanies should not pursue business model reinvention unless they are confident that the opportunity is large enough to warrant the effort."

"These questions will help you evaluate whether the challenge of business model innovation will yield acceptable results."

1. Can you nail the job with *a focused, compelling customer value proposition*?
2. Can you devise a model in which *all the elements* – the customer value proposition, the profit formula, the key resources, and the key processes – *work together* to get the job done in the most efficient way possible?
3. Can you create a new business development process *unfettered by the, often negative, influences* of your core business?
4. Will the new business model *disrupt competitors*?"

HVORNÅR BØR DER TÆNKES NYT?

Johnson et al. (2008): 'Reinventing your business model'

Ingen one-size-fits-all, men særlig fem strategiske situationer nødvendiggør en egentlig ny forretningsmodel:

1. "The opportunity to address through disruptive innovation the needs of large groups of potential customers who are shut out of a market entirely..."
2. "The opportunity to capitalize on a brand-new technology by wrapping a new business model around it (...) or the opportunity to leverage a tested technology by bringing it to a whole new market..."
3. "The opportunity to bring a job-to-be-done focus where one does not yet exist."
4. "The need to fend off low-end disrupters."
5. "The need to respond to a shifting basis of competition."

3. DIGITALE FORRETNINGSMODELLER

“TO THRIVE IN A DIGITIZED UNIVERSE, BUSINESSES OF ALL SIZES WILL NEED TO REINVENT THEMSELVES AND SUBSTANTIALLY CHANGE THEIR ORGANIZATIONS, INCLUDING THEIR BUSINESS MODELS, PEOPLE, STRUCTURES, CRITICAL COMPETENCIES, AND CULTURES.”

WEILL & WOERNER, 2018: 2

"[SUCCESFULDE DIGITALE FORRETNINGSMODELLER ER]...NOT REALLY ABOUT BEING DIGITAL."

Se de 6 nye farver

"THE KEY IS *DIFFERENTIATING YOUR BUSINESS* BY OFFERING CUSTOMERS SOMETHING NEW AND COMPELLING, ENABLED BY THE VEHICLE THAT DIGITAL OFFERS, AND CREATING A DESTINATION CUSTOMERS WANT TO VISIT."

FIRE DIGITALE FORRETNINGSMODELLER

Weil & Woerner (2018: 8): Digital Business Model Framework

“...[D]igitization is compelling companies to move their business models on two dimensions”:

1. “...from controlled value chains to more-complex, networked systems.
2. “...from less familiarity with customer needs and life events to a better, closer understanding of them, resulting in better customer engagement.”

FIRE DIGITALE FORRETNINGSMODELLER

Business Model Generation

WRITTEN BY
Alexander Osterwalder & Yves Pigneur

CO-CREATED BY
An amazing crowd of 470 practitioners from 45 countries

DESIGNED BY
Alan Smith, The Movement

"The business model is like a blueprint for a strategy to be implemented through organizational structures, processes, and systems."

Osterwalder & Pigneur (2010: 15)

“The Value Propositions Building Block describes the bundle of products and services that create value for a specific Customer Segment”

“The Value Proposition is the reason why customers turn to one company over another. It solves a customer problem or satisfies a customer need.”

Osterwalder & Pigneur (2010: 20)
