OG SÅ TIL DAGENS EMNE

INNOVATION OG DISRUPTION

- 7 minutter med sidemakkeren / bordet rundt
- Hvad forstår I ved de to begreber?
- Hvad vil vi som organisation opnå ift. de to begreber?
- Følges de altid ad?

Innovation

“Any idea, practice, or object that is perceived as new by an individual or other unit of adoption could be considered an innovation available for study.”

Rogers (1962/1983)

“Broadly speaking, innovation is depicted as the creation of novel products by recombining production forces for market-based exchange (Schumpeter 1934/1983) [...] we define innovation as the co-creation of novel offerings through the recombination of digital and/or physical components.”

Hukal, P. & Henfridsson, O. (2017)

innovation noun

in·no·va·tion ˌi-nə-ˈvā-shən

[Synonyms of innovation >](#)

- 1 : a new idea, method, or device : **NOVELTY**
- 2 : the introduction of something new

innovational ˌi-nə-ˈvā-sh(ə-nəl) adjective

▪ Merriam-Webster.com

Digital Innovation

“...carrying out of new combinations of digital and physical components to produce novel products.”

Yoo et al. (2010)

“Digital innovation is the use of digital technology during the process of innovating.”

Nambisan et al. (2017)

Egenskaber ved Digital Innovation

- Digital teknologi
- Rekombination
- Værdiskabelse (i samspil)

Digital teknologi

I modsætning til fysisk materiale fungerer det digitale på grundlag af adgang til og manipulation af en fælles ressource; digital lagrede oplysninger.

De kan karakteriseres ved:

- Datahomogenitet
- Redigerbarhed
- Selvrefererende egenskaber

Rekombination

- Adskillelsen af form og funktion
- Adskillelse af indhold og medium
- Generativitet

Værdiskabelse (i samspil)

- Typisk afbilledet som værdien af udveksling af et produkt når det afleveres.
- I de fleste digitale innovationsstudier er værdi underlagt skabelsen af et netværk af aktører
- Det medfører at informationsressourcer er bredt tilgængelige og integrerbarheden er høj ift. konfiguration af nye digitale tjenester
- Tre karakteristika:
 - Kontekstuel
 - Relativ
 - Interaktionel

Strategier ift. Digitale Innovationer

1. Er målet at skabe en innovation, der er internt fokuseret eller eksternt fokuseret?
2. Skaber det noget nyt, eller forbedrer det noget, der allerede eksisterer?

Ud fra svarene kan du spørge:

1. Hjælper dette med at øge medarbejderoplevelsen eller forretningsdriften?
2. Tænker vi på innovation som en forretningsmodel, eller er det en kundevendt innovation?

Digital Innovation Strategy

Overall Digital Innovation
Strategy Framework

	INTERNAL Innovation	EXTERNAL Innovation
Invent NEW	• Business Operations • Employee Experience	• Business Model • Customer Facing
Enhance EXISTING	• Business Operations • Employee Experience	• Business Model • Customer Facing

Et studie

MIT Sloan Center for Information Systems Research (Fonstad 2017)

- Konkurrencedygtige virksomheder differentierer sig ved porteføljeallokering (IKKE ved samlede forbrug)
- Konkurrencedygtige porteføljer består af alle fire typer digitale innovationer
- Afhængigt af målet kan de porteføljer, der understøtter bedst matches.

Figure 3: The Competitive Portfolio of the Most Competitive Companies Along Four Business Outcomes

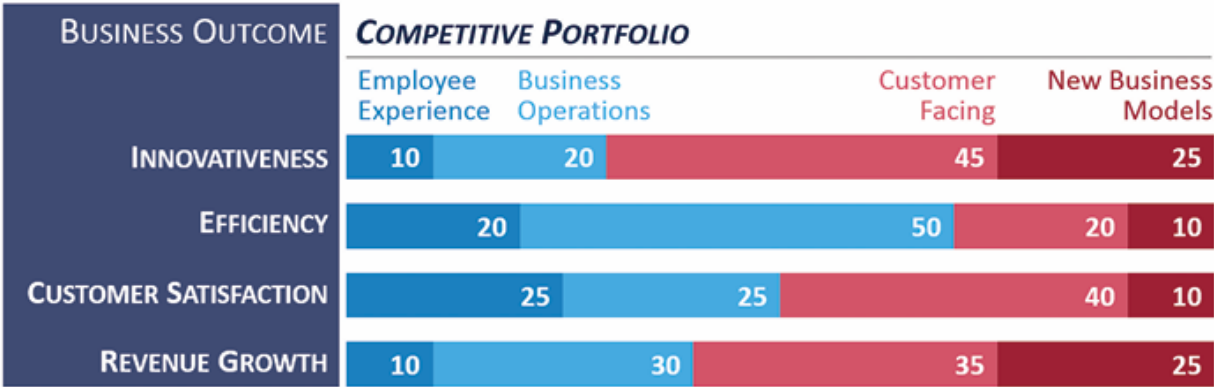

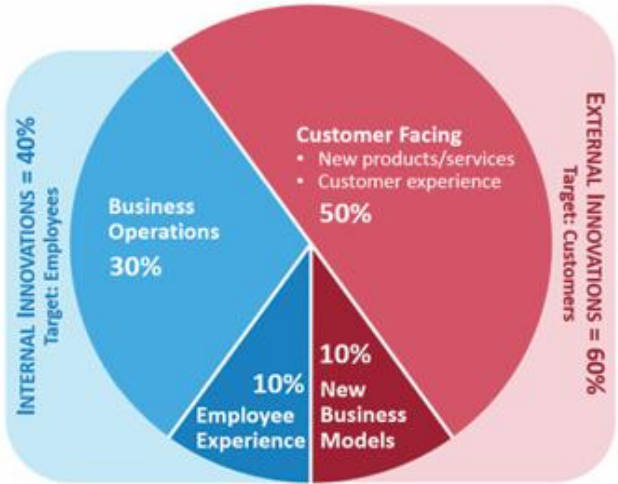

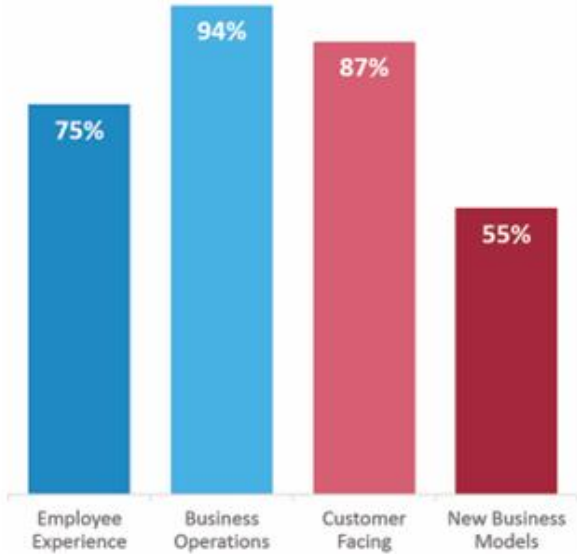

Figure 1: The Average Digital Innovation Portfolio

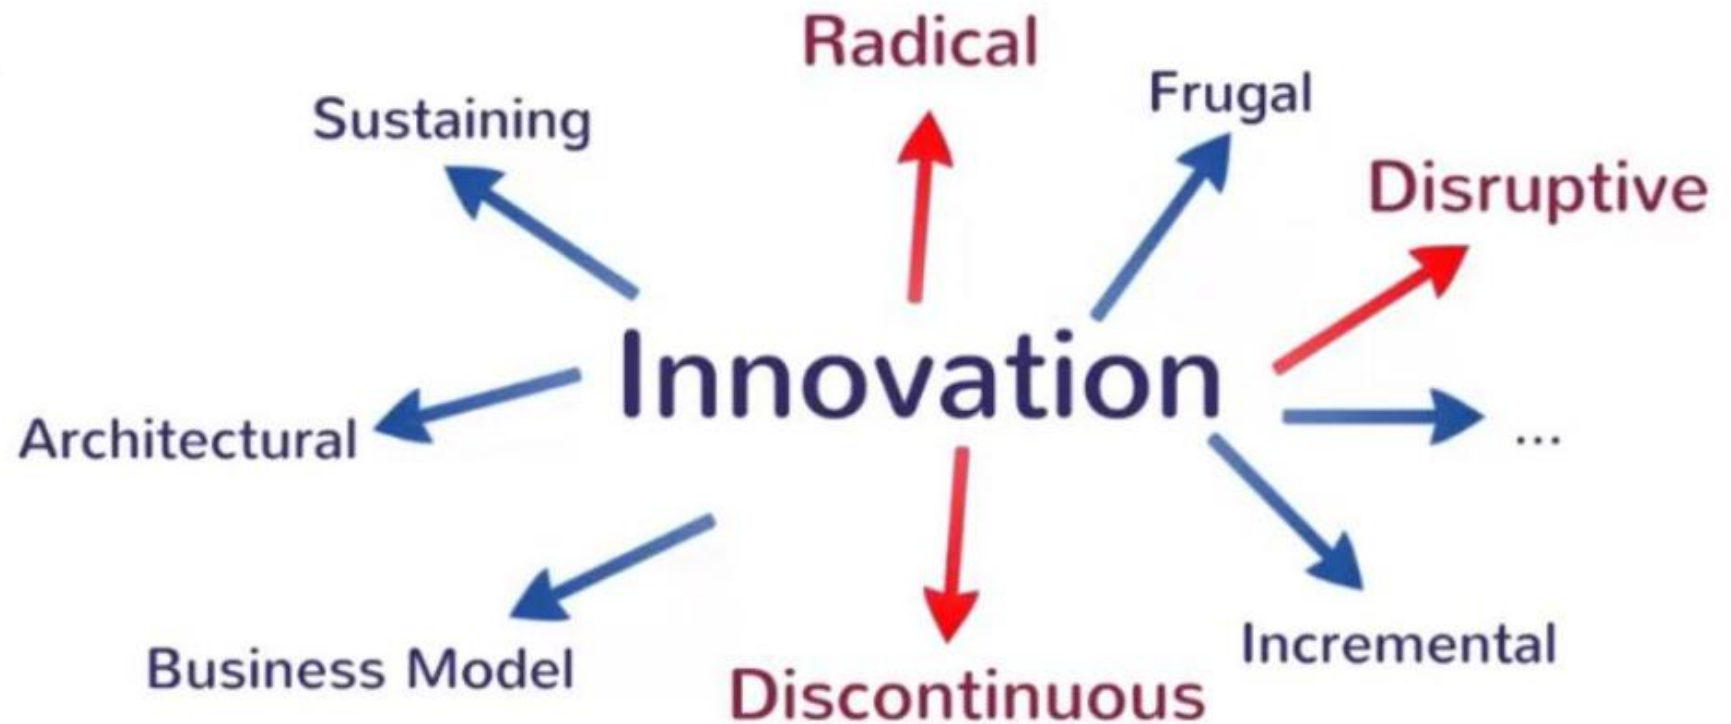

Represents respondents' total spend on *digital innovation*: producing any new (for the company) or significantly improved product, service, or process that relies in large parts on digital technologies such as social, mobile, cloud computing, analytics, and/or the Internet of Things (IoT).

Figure 2: The Percentage of Respondents Investing in Each Type of Digital Innovation

Disruption

Du er her: Forside / Den Danske Ordbog / Ordbog

disruption substantiv, fælleskøn

BØJNING -en, -er, -erne

UDTALE [dis'ʌbʁən] eller [disʁub'ɔʁn] ⓘ

OPRINDELSE kendt fra 1997 • via engelsk *disruption* 'opbrud, sammenbrud', fra latin *disruptio* verbalsubstantiv til *disrumpere* 'afbryde, briste' • introduceret som økonomisk begreb af Clayton M. Christensen i 1995

Betydninger

udvikling hvor der vendes helt op og ned på en eksisterende tilstand eller et eksisterende marked; det at gribe ind i noget og skabe en helt ny situation

Disruptionen giver store udfordringer for de danskere, der ikke er digitale
FyensSt2017

Uanset hvilken model man vælger, er det på høje tid at komme i gang med innovationen, for disruption er lige om hjørnet i alle brancher
Pol2016

fra Den Danske Ordbog

Disruptions styrke

“The impact of disruptive innovations can be so extreme that a virtually non-existent firm can rise to dominance while a leading incumbent can basically cease to exist or largely diminish in importance. These extreme outcomes underscore the need to understand the role played by information technology and information systems in the occurrence of disruptive innovation”

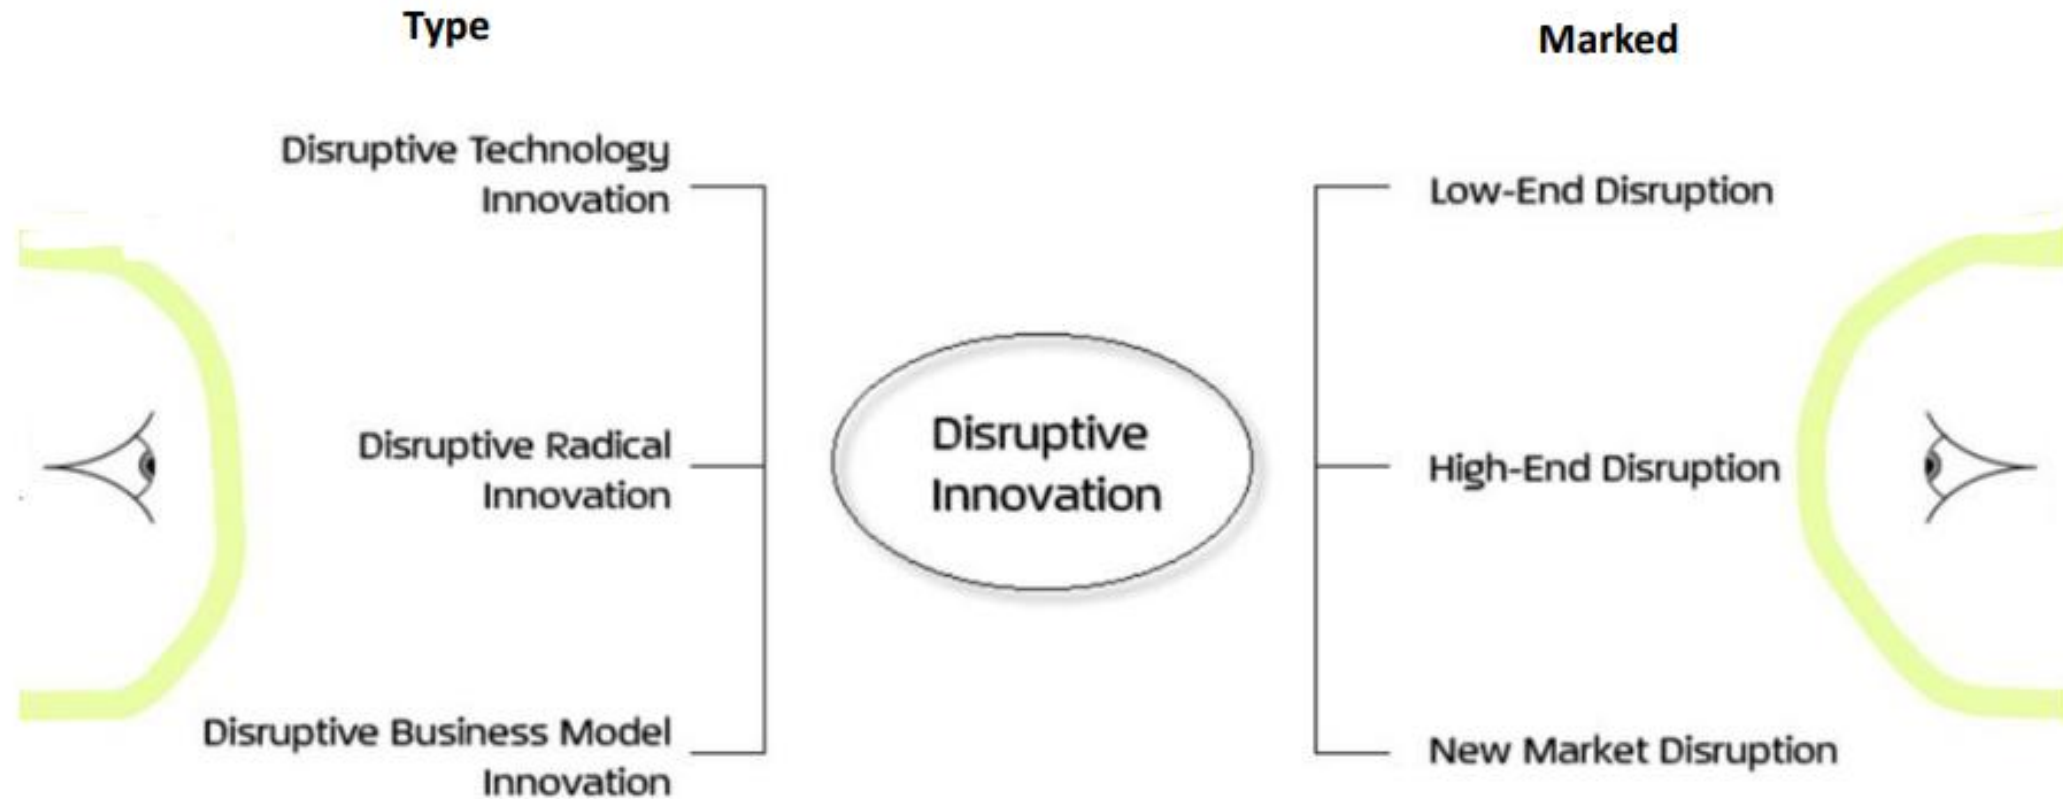

(...)

“A disruptive innovation introduces a different set of attributes relative to a market which are unattractive for mainstream customers on inception due to variance in attributes valued by this market - although a different market segment may value the new attributes. Subsequent developments over time, however, raise the innovation's attributes to a level sufficient to satisfy mainstream customers, thus attracting more of the mainstream market.”

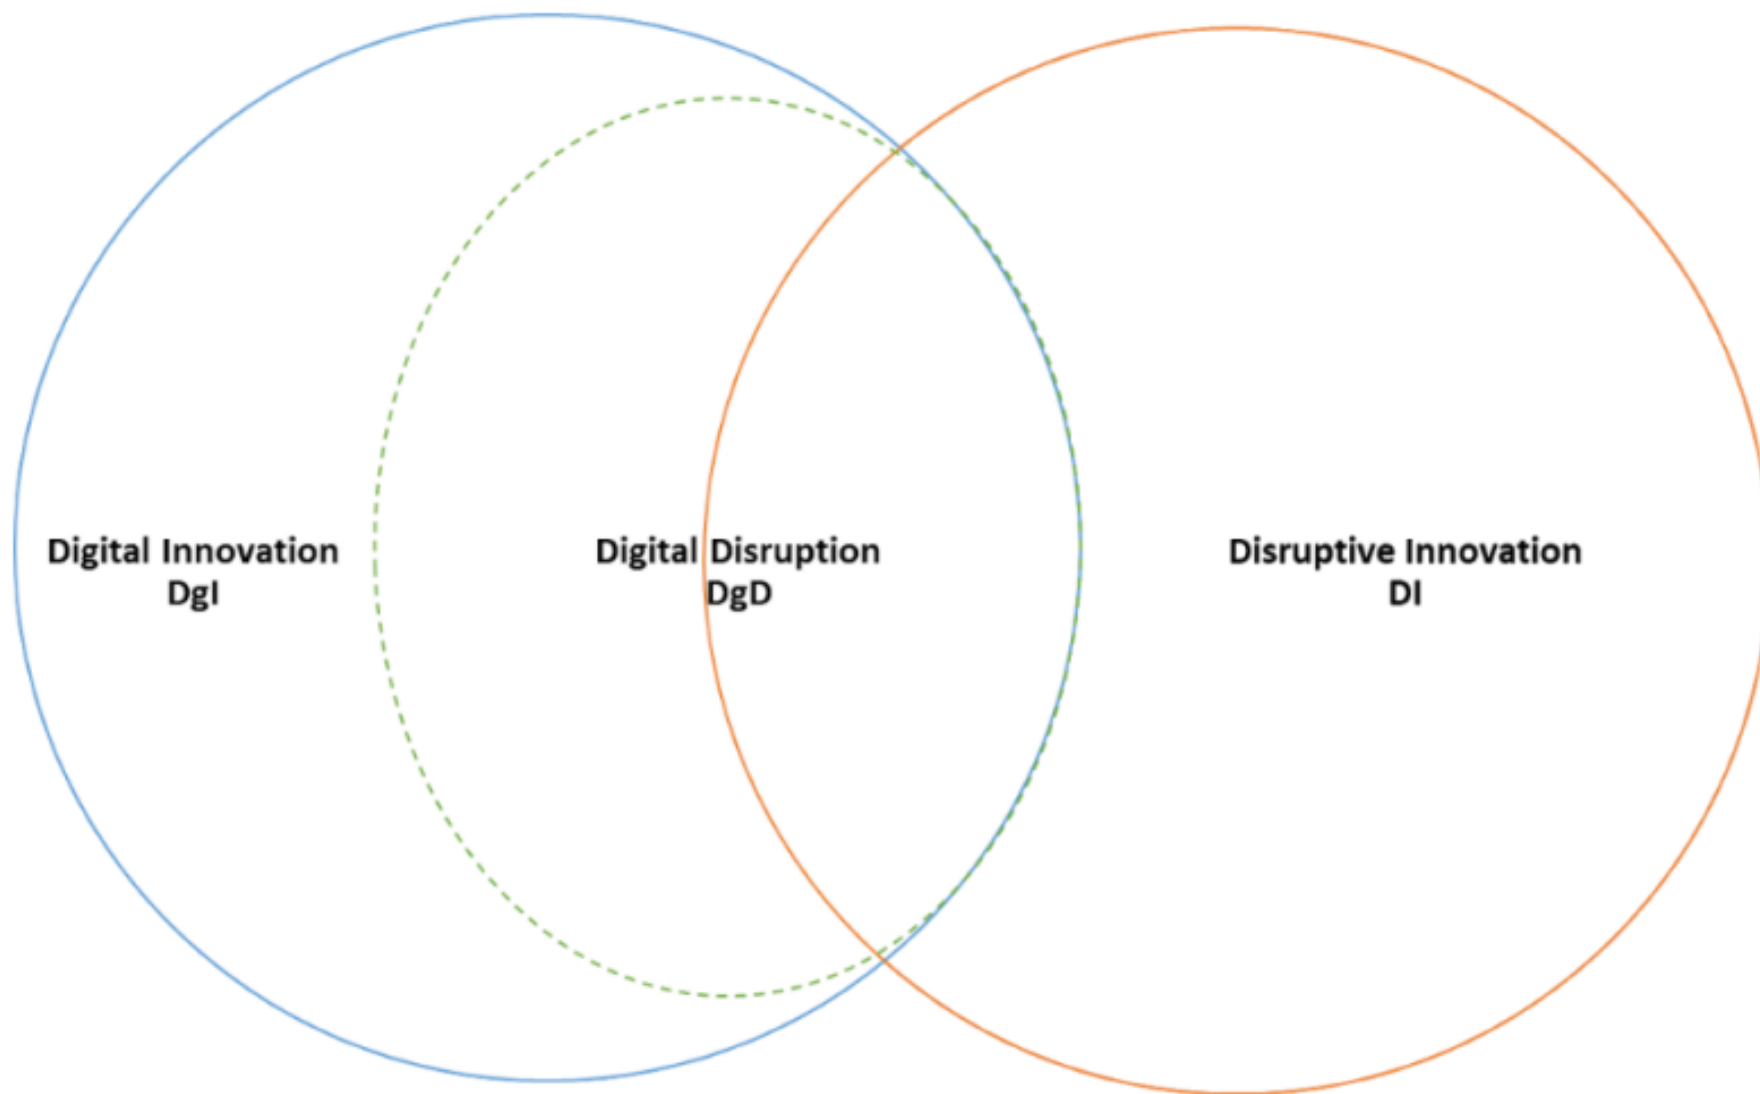

{ Where: Market = (products, business models, goods, services... and/or technologies).
Variance = (inferior, superior, complexity...) and
Attributes = (features, performance, price, operations, business rules... and/or processes) }

Baiyere & Salmela (2013)

Evaluering

Illustrative Example	Disruptive	Digital	Innovative
<u>Netflix Streaming Video on Demand:</u> Novel combination of digital technology components to create and capture value by delivering, analyzing, and producing digital video content on demand. Example extends to most kinds of digital media content e.g., music streaming (Rierner and Johnston 2019) or e-books (Utesheva et al. (2016)	<u>Yes:</u> The economic paradigm of video on demand was bound to mediums requiring branch networks to obtain physical copies of mediums holding content (e.g., video, DVD's). Content production was the result of major film studios. Netflix profoundly altered this prior logic of film production, delivery and consumption	<u>Yes:</u> Digitized media content is transmitted using digital infrastructure (network) and components (apps, service, devices); Content can be consumed on a variety end-user devices. Trace data is collected to analyze preferences which in turn fuels decisions on content discovery and production.	<u>Yes:</u> <u>New to customers:</u> Video Streaming on Demand offered a new to consume video content <u>New to incumbents:</u> Incumbents (e.g., Blockbuster) faced with similar pressure to react to technological development <u>New to adjacent industry:</u> offers a direct channel to gather feedback for future content production and

Digital Disruption

“(...) the alteration of a domain-specific paradigm due to the digital attributes of an innovation.”

Baiyere, A. & Hukal, P. (2020)

“Disruptiveness”

- Markedet
- Relativitet
- Forandring / Påvirkning ift. Tid

“Digitalitet”

- Data homogenitet
- Redigerbarhed
- Selvreferende egenskaber

Eksempler

Flere eksempler

- Radio
- TV
- Telefon
- Kreditkort
- Google Search (Maps?, AdWords...)
- Uber
- Mainframe vs. PC
- Iphone
- AI

- Amazon
- Just Eat / Wolt – and similar
- Biler -> Tesla
- Voice over IP
- SoMe (På flere fronter)
- Blockchain
