

IT-STRATEGI

Lektion 4: Strategi og digital transformation

5. marts, 2026

<https://offdrive.com>

KAN I HUSKE...?

Lektion 3: Strategisk analyse (del II) og digitale forretningsmodeller

1. Forretningsmodellen er fundamentet for en virksomhedens strategiske position
 - Forretningsmodeller kan være unikke eller ej; og bevidste eller ubevidste.
2. Virksomhedens 'customer value proposition' er centralt i vores forståelse af forretningsmodeller
3. Forretningsmodeller kan justeres og de kan fornyes.
4. Digitale forretningsmodeller er ikke udelukkende digitale, men indarbejder digitale muligheder:
 - Mere åbne, mere komplekse netværk
 - Stærkere kunderelationer
5. Fire grund-modeller: 'Omnichannel', 'supplier', 'ecosystem driver' og 'modular producer'
6. Osterwalders & Pigneurs (2010) 'business model canvas' er et stærkt analytisk redskab, men er ikke en strategi i sig selv.

LEKTIONER

Lektion	Underviser	Øvelse
1. Introduktion til kurset	Ulrik R & Sebastian W	Nej
2. Strategisk analyse (del I) og typiske strategiske virkemidler	Sebastian W	Ja
3. Strategisk analyse (del II) og digitale forretningsmodeller	Ulrik R	Ja
4. Strategi og digital transformation	Ulrik R	Ja
5. Digital innovation, disruption og strategier	Sebastian W	Ja
6. Digitale økosystemer	Sebastian W	Ja
7. Implementering af strategier	Ulrik R	Ja
8. 'Case competition'	Ulrik R m.fl.	Ja
9. Opsummering og eksamensforberedelse	Ulrik R & Sebastian W	Nej

DE NÆSTE Knap 100 MINUTTER...

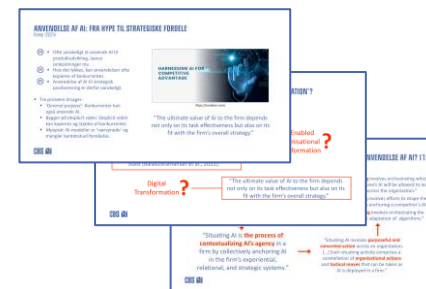

Lektion 4: Strategi og digital transformation

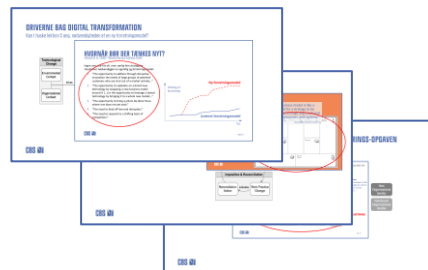

1. Introduktion

2. Nøgleforskelle

3. Eksempel: Anvendelse af AI

4. Strategiske implikationer

5. Afslutning

EFTER LEKTION 4 BØR I KUNNE...

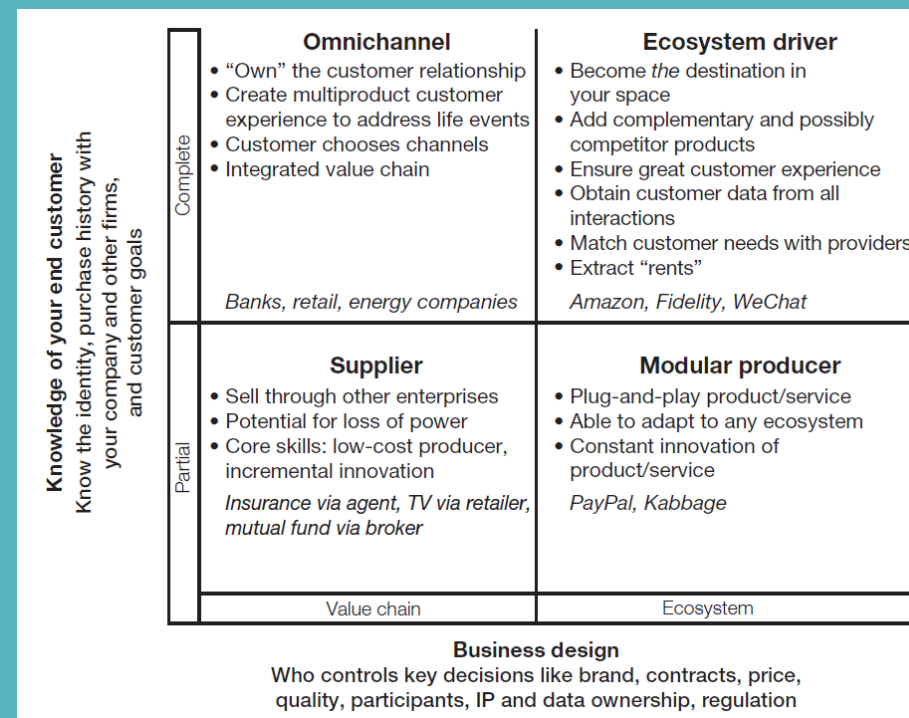

- ☐ Redegøre for forskellen på 'IT-Enabled Organizational Transformation' til 'Digital Transformation'.
- ☐ Beskrive og forklare karakteren af virksomheders teknologibaserede transformation.
- ☐ Anvende forståelsen af virksomheders teknologibaserede transformation i relation til adoption og anvendelse af AI
- ☐ Reflektere over sammenhængen mellem virksomheders teknologibaserede transformation og relevante forhold på makroniveau.

STRATEGI HANDLER OM POSITIONERING

Porter (1996): 'What Is Strategy? '

- "...strategic positioning means performing different activities from rivals' or performing similar activities in different ways."
- "Competitive strategy is about being different. It means deliberately choosing a different set of activities to deliver a unique mix of value."

FORRETNINGSMODELLEN ER FUNDAMENTET FOR VIRKSOMHEDENS STRATEGISKE POSITION

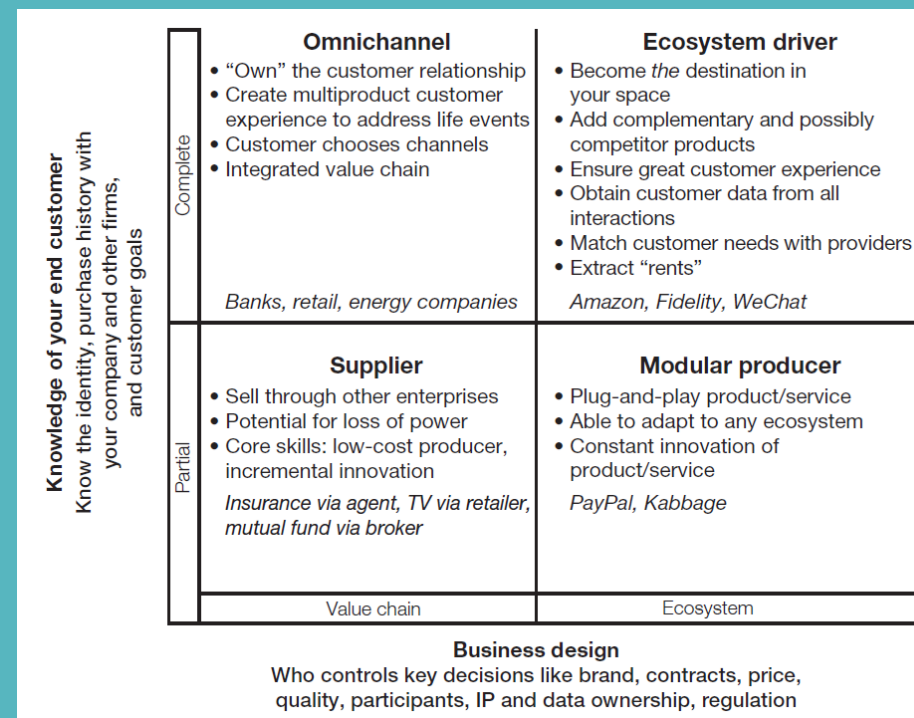

EGENTLIG DIGITAL TRANSFORMATION ER EN STOR MUNDFULD

Wessel et al. (2021) : ‘Unpacking the Difference between Digital Transformation and IT-Enabled Organizational Transformation’

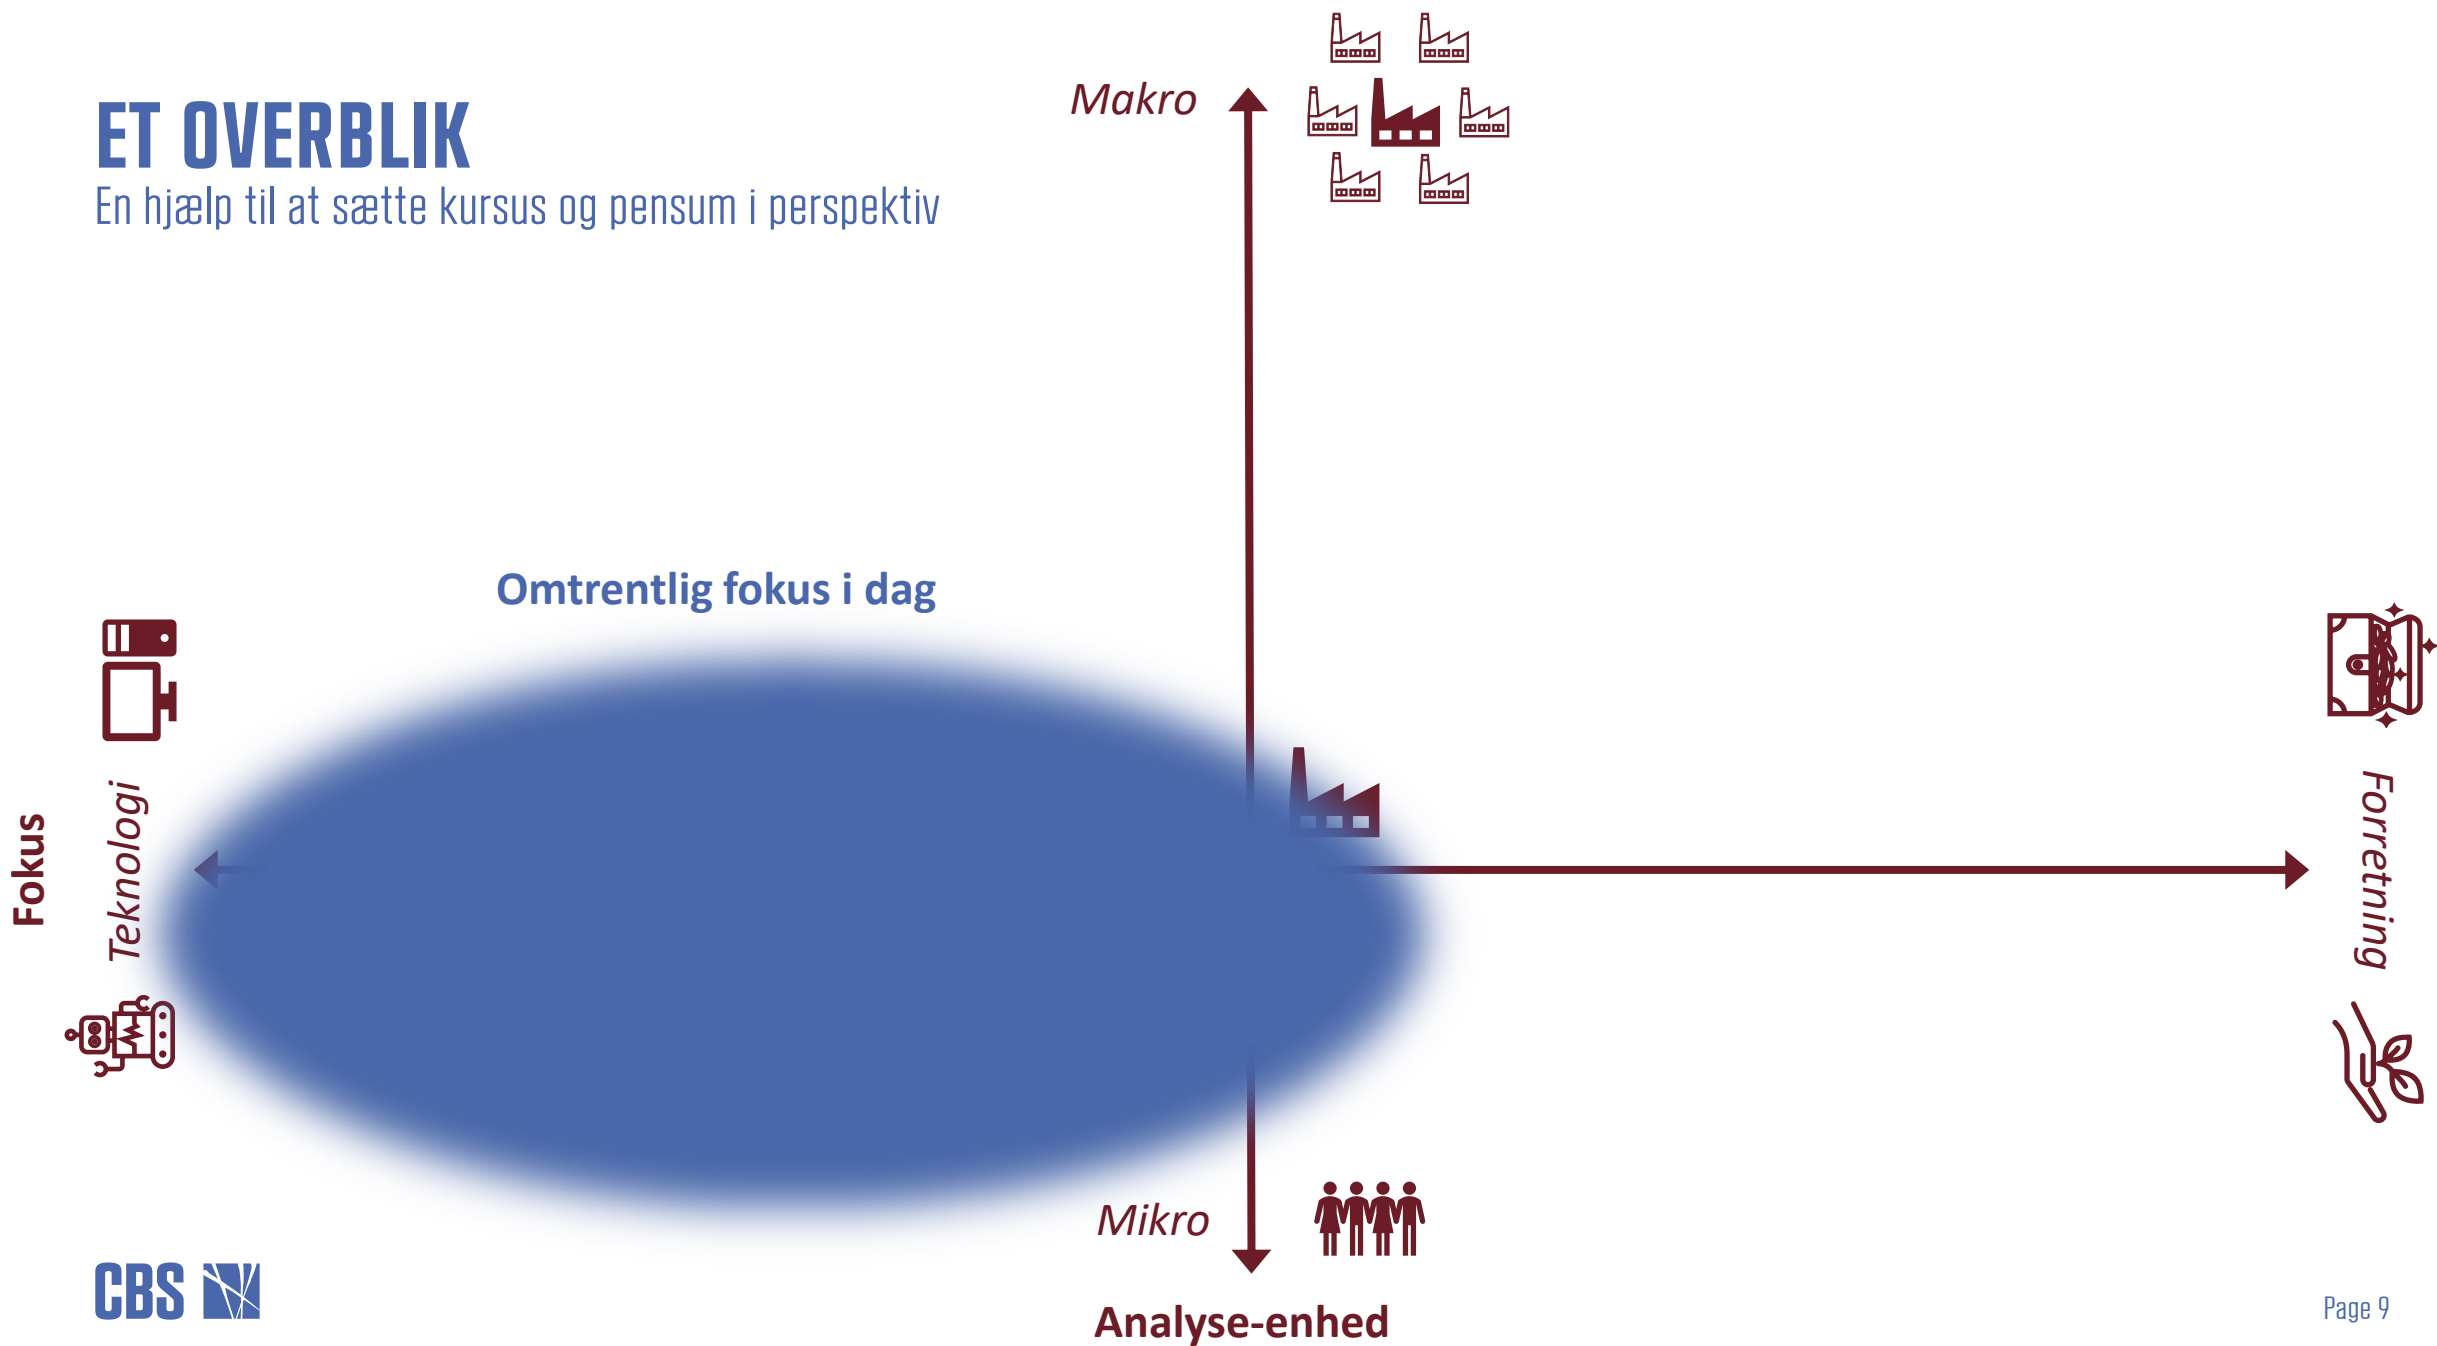

- “In [digital transformations], digital technology is central to redefining value propositions, which leads to the emergence of a new organizational identity.”

FORRETNINGSMODELLEN ER FUNDAMENTET FOR VIRKSOMHEDENS STRATEGISKE POSITION

ET OVERBLIK

En hjælp til at sætte kursus og pensum i perspektiv

2. NØGLEFORSKELLE

**'DIGITAL TRANSFORMATION' VS. 'IT-ENABLED ORGANIZATIONAL
TRANSFORMATION'**

Digital Transformation

"[D]igital technology is central to redefining value propositions, which leads to the emergence of a new organizational identity"

"...we suggest that, while there are similarities and nuanced differences in terms of transformation agendas and driving forces, the key differentiator [...] lies in how digital technology, value propositions, and organization identity interrelate in these respective processes.

Wessel et al. (2021: 103)

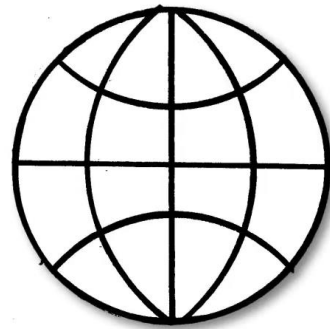

IT-Enabled Organisational Transformation

"...the use of digital technology to support and reinforce an existing value proposition and identity."

DET EMPIRISKE GRUNDLAG

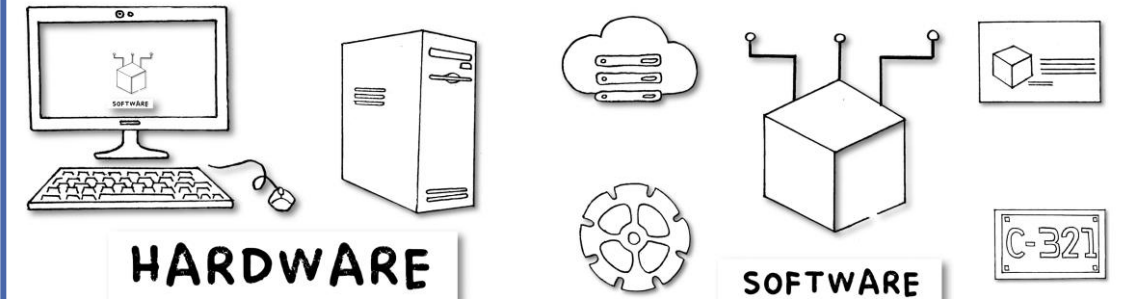

Wessel et al. (2021): Unpacking the Difference between Digital Transformation and IT-Enabled Organizational Transformation'

**MOST DIGITAL
HOSPITAL
IN THE WORLD**

CASE 1: ALPHA

Hospital in France
Fieldwork over approx. 18 months

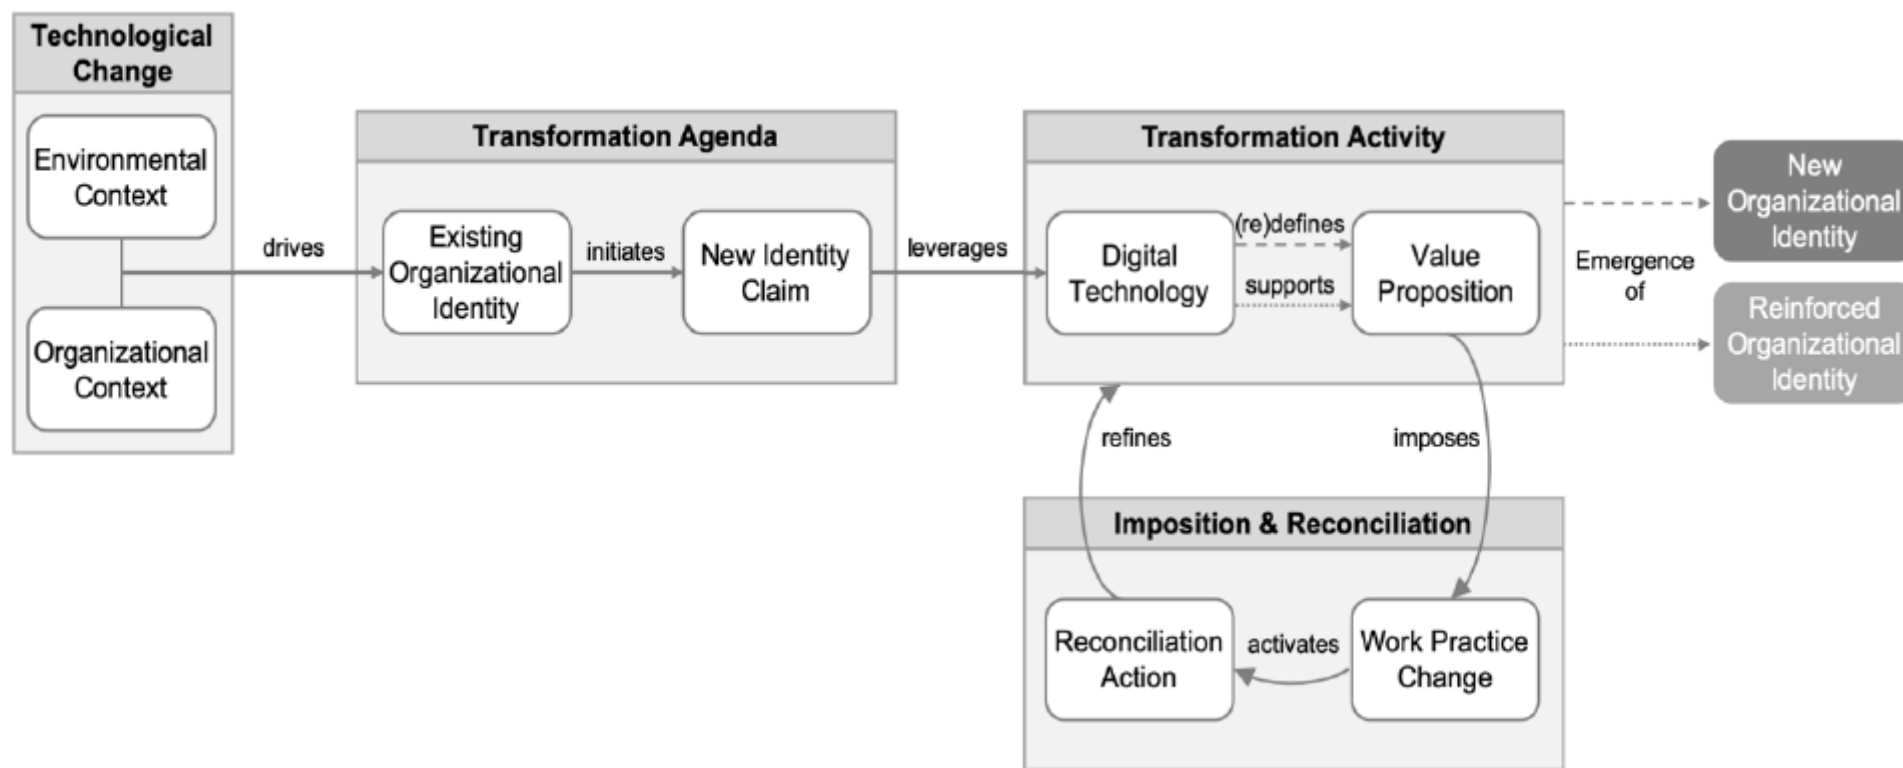

CASE 2: BETA

Manufacturing company in Finland
Fieldwork over approx. 13 months

SAMMENHÆNGEN MELLEM DIGITAL TEKNOLOGI, 'VALUE PROPOSITION' OG ORGANISATORISK IDENTITET (1)

Wessel et al. (2021)

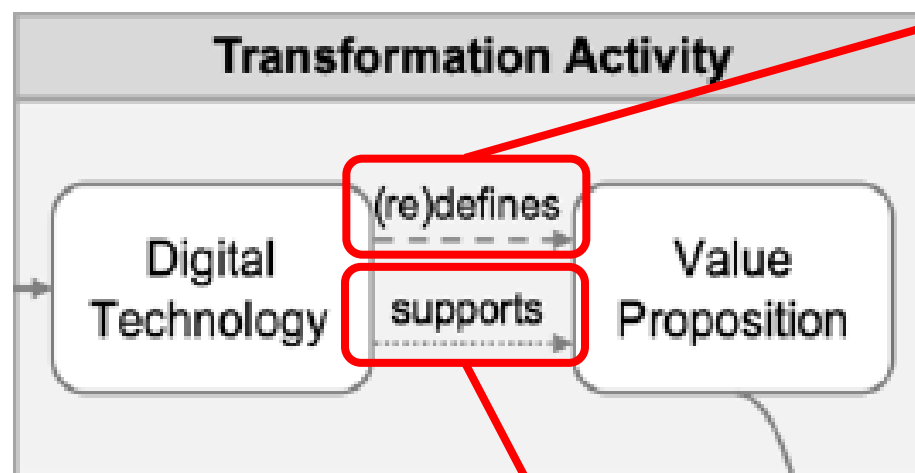

SAMMENHÆNGEN MELLEM DIGITAL TEKNOLOGI, 'VALUE PROPOSITION' OG ORGANISATORISK IDENTITET (2)

Wessel et al. (2021)

CASE 2: BETA

“We used to be machine manufacturers [...] but now the control [software] system has grown in such scale that it doesn't need the hardware anymore” (Wessel et al., 2021: 114-115)

CASE 1: ALPHA

“Senior management wanted to improve performance in all departments by implementing the EMR as a cross-functional software” (Wessel et al., 2021: 114)

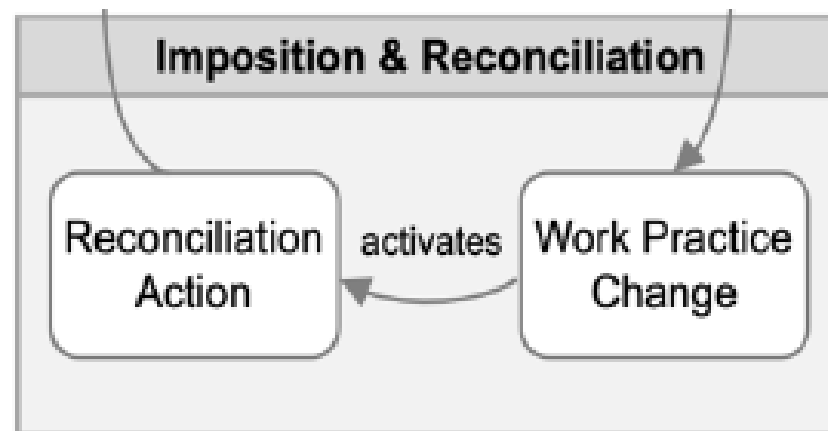

SAMMENHÆNGEN MELLEM DIGITAL TEKNOLOGI, 'VALUE PROPOSITION' OG ORGANISATORISK IDENTITET (2)

Wessel et al. (2021)

CASE 2: BETA

“A number of employees quit the company as they considered the change in the direction of the company to be in misalignment with their competence or the prior identity that they could relate to” (Wessel et al., 2021: 115)

“...this came at a cost since a number of salespersons also left the company and Beta had to hire replacements who were digitally savvy but lacked access to high-end customers.” (Wessel et al., 2021: 113)

CASE 1: ALPHA

“While the EMR system was intended to replace existing legacy systems and optimize procedures, in reality, it increased the workload of secretaries and a majority of them felt overwhelmed by the system.” (Wessel et al., 2021: 109)

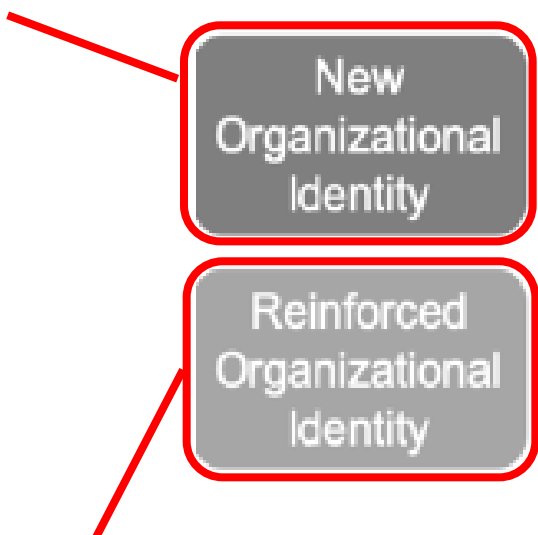

“The difficulties mentioned above made the implementation process slower and more expensive than planned, but the EMR was eventually integrated into Alpha.” (Wessel et al., 2021: 110)

SAMMENHÆNGEN MELLEM DIGITAL TEKNOLOGI, 'VALUE PROPOSITION' OG ORGANISATORISK IDENTITET (3)

Wessel et al. (2021)

CASE 2: BETA

"Beta's management wanted the organization itself to become a "trusted digital partner..." (Wessel et al., 2021: 117)

New
Organizational
Identity

Reinforced
Organizational
Identity

CASE 1: ALPHA

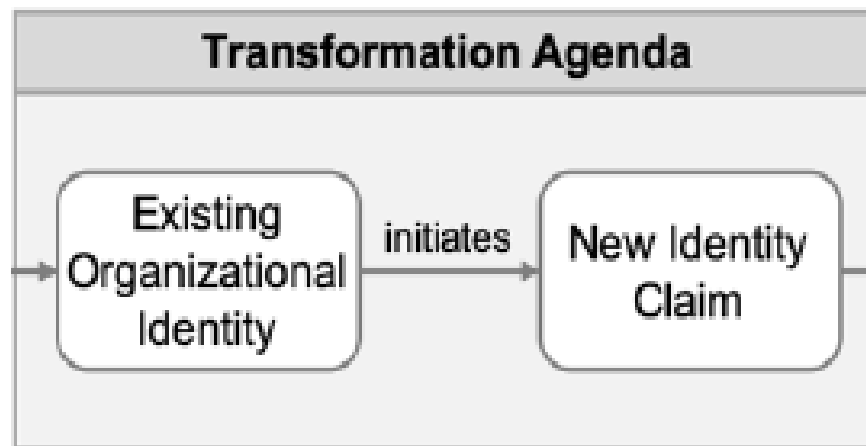

"The transformation agenda in these contexts thus seeks to make work more efficient, effective, or "digital" but such an agenda draws from identity claims and value propositions that, in general, remain the same." (Wessel et al., 2021: 117)

SAMMENHÆNGEN MELLEM DIGITAL TEKNOLOGI, 'VALUE PROPOSITION' OG ORGANISATORISK IDENTITET (4)

Wessel et al. (2021)

CASE 2: BETA

“Beta’s senior management implemented a “digital strategy” to fundamentally alter the nature of the value offered by Beta by redefining the organization as a provider of digital services that catered to manufacturing companies” (Wessel et al., 2021: 111)

CASE 1: ALPHA

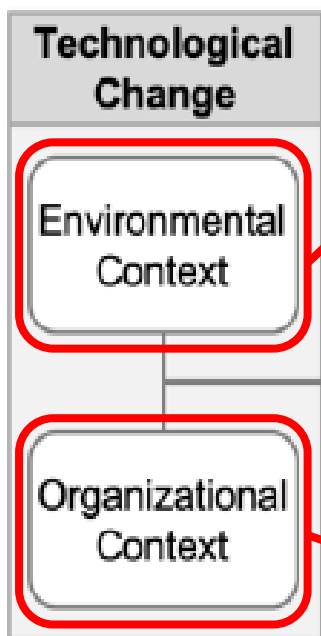

““The project [...] has three objectives: improve patient care, improve IS and hospital management, and improve management of administrative tasks and patient appointments”” (Wessel et al., 2021: 114)

SAMMENHÆNGEN MELLEM DIGITAL TEKNOLOGI, 'VALUE PROPOSITION' OG ORGANISATORISK IDENTITET (5)

Wessel et al. (2021)

CASE 1: ALPHA

““The ‘Digital Hospital’ national program came with important funding for the EMR implementation for several years. Alpha hospital applied for this program.” (Wessel et al., 2021: 113)

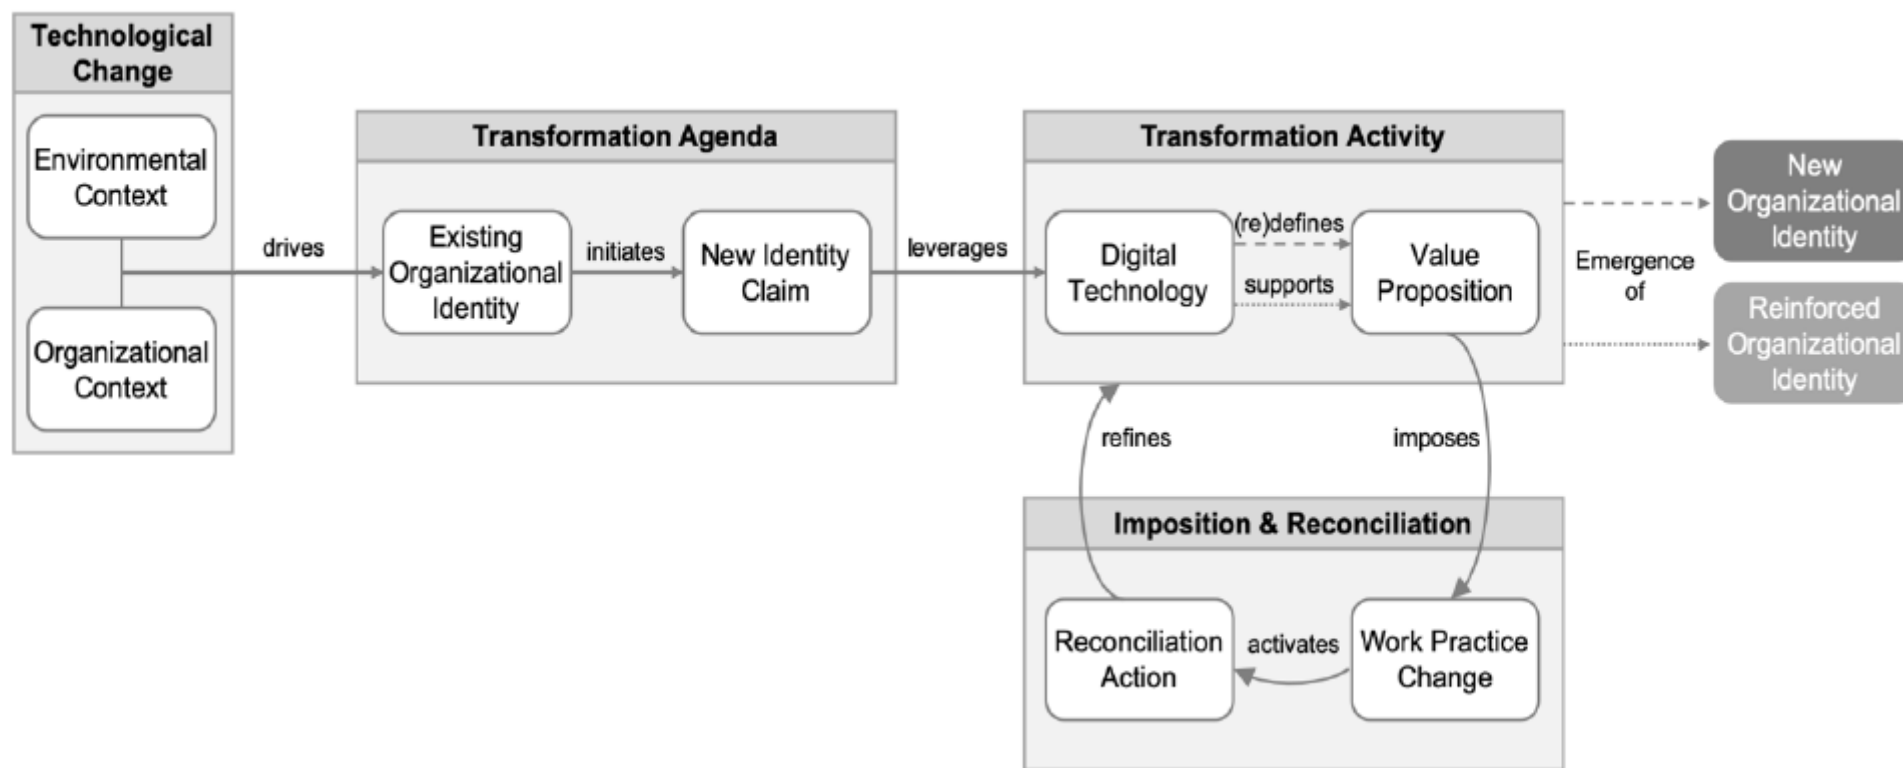

CASE 2: BETA

“Internal search for growth potential among existing products intensifies and draws attention to the existing software that is typically bundled with hardware” (Wessel et al., 2021: 114)

DET STORE BILLEDE

Wessel et al. (2021)

HVILKE FORDELE HAR WESSEL ET AL. (2021)-MODELLEN OG HVILKE SVAGHEDER HAR DEN (I FORHOLD TIL STRATEGISKE SPØRGSMÅL) ?

OVERVEJ I 5 MINUTTER MED SIDEMANDEN/-KVINDEN

3. EKSEMPEL: ANVENDELSE AF AI

FRA 'IT-ENABLED ORGANIZATIONAL TRANSFORMATION' TIL 'DIGITAL TRANSFORMATION'?

ANVENDELSE AF AI: FRA HYPE TIL STRATEGISKE FORDELE

Kemp (2024)

- ☹️ ▪ Ofte vanskeligt at anvende AI til produktudvikling, lavere omkostninger mv.
- ☹️ ▪ Hvis det lykkes, kan anvendelsen ofte kopieres af konkurrenter.
- ☹️ ▪ Anvendelse af AI til strategisk positionering er derfor vanskeligt.

- Tre primære årsager:
 - *'General purpose'*: Konkurrenter kan også anvende AI.
 - *Bygger på eksplicit viden*: Eksplicit viden kan kopieres og stjæles af konkurrenter.
 - *Myopisk*: AI-modeller er 'nærsynede' og mangler kontekstuel forståelse.

<https://medium.com/>

“The ultimate value of AI to the firm depends not only on its task effectiveness but also on its fit with the firm’s overall strategy.”

ER SUCCEFULD ANVENDELSE AF AI LIG MED 'DIGITAL TRANSFORMATION'?

Kemp (2024)

“...achieving [strategic advantages] is made difficult by AI’s propensity to act with agency (Murray et al., 2021), which may be counterproductive when not properly contextualized within the firm. I also accept that uncontextualized agency may be AI’s baseline State (Balasubramanian et al., 2022).”

IT-Enabled
Organisational
Transformation ?

Digital
Transformation ?

“The ultimate value of AI to the firm depends not only on its task effectiveness but also on its fit with the firm’s overall strategy.”

HVORDAN KAN EN VIRKSOMHED OPNÅ STRATEGISKE FORDELE AF ANVENDELSE AF AI? (1)

Kemp (2024)

“...firms may (a) circumscribe AI’s agency in the firm’s unique experiences and systems, and (b) embed this transformed AI in the firm’s organizational capabilities through three **situating activities**: grounding, bounding, and recasting.”

“Situating AI is **the process of contextualizing AI’s agency** in a firm by collectively anchoring AI in the firm’s experiential, relational, and strategic systems.”

“Situating AI involves **purposeful and concerted action** across an organization. [...] Each situating activity comprises a constellation of **organizational actions** and **tactical moves** that can be taken as AI is deployed in a firm.”

“**Grounding** involves orchestrating which experiences one’s AI will be allowed to learn from across the organization.”

“**Bounding** involves efforts to shape the experiences anchoring a competitor’s AI.”

“**Recasting** involves orchestrating the continual adaptation of algorithms.”

HVORDAN KAN EN VIRKSOMHED OPNÅ STRATEGISKE FORDELE AF ANVENDELSE AF AI? (2)

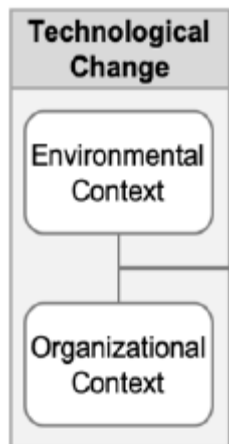

Kemp (2024)

Situated AI for Organizational Capabilities				
Situating Activity	Definition	Strategic Limitation of AI Addressed	Dimension of Human Agency	Examples of Orchestrated Activities
Grounding	Circumscribing AI's agency in a firm's deliberate learning paradigm	Generic	Iterative	- Creating data (i.e., with experiments) - Digitizing manufacturing equipment - Fine-tuning pretrained models - Parsing data
Bounding	Circumscribing AI's agency in a firm's nexus of contracts	Explicit	Practical Evaluative	- Enforcing confidentiality agreements - Signing data-exclusivity deals - Investing in cyber-security innovations - Capturing bottlenecks in computing or server management
Recasting	Circumscribing AI's agency in a firm's system of task, strategic, and relational interdependencies	Myopic	Projective	- Customizing AI algorithms - Altering routines to boost compatibility with AI - Restructuring links between AI algorithms (within a conjoined routine) - Promoting and demoting entire algorithms or routines

4. STRATEGISKE IMPLIKATIONER

DRIVERNE BAG DIGITAL TRANSFORMATION

Kan I huske lektion 3 ang. nødvendigheden af en ny forretningsmodel?

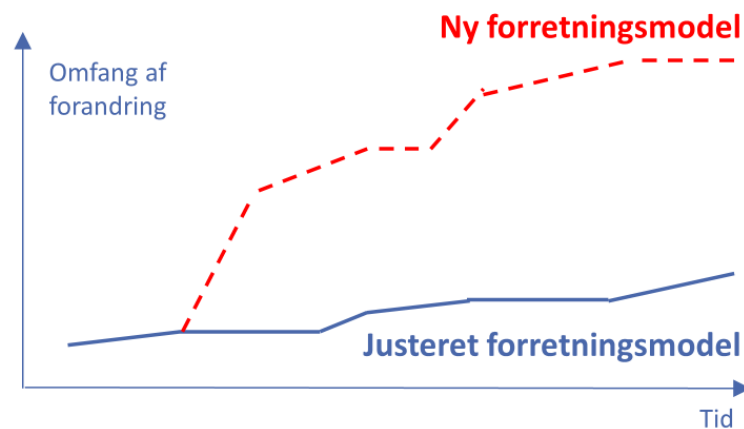

HVORNÅR BØR DER TÆNKES NYT?

Johnson et al. (2008): 'Reinventing your business model'

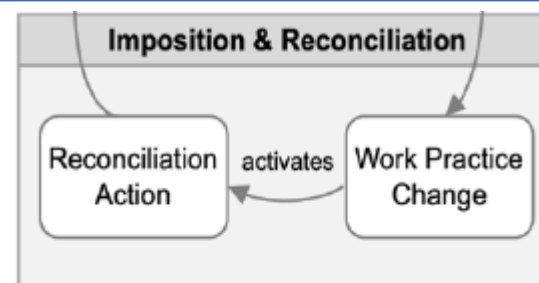

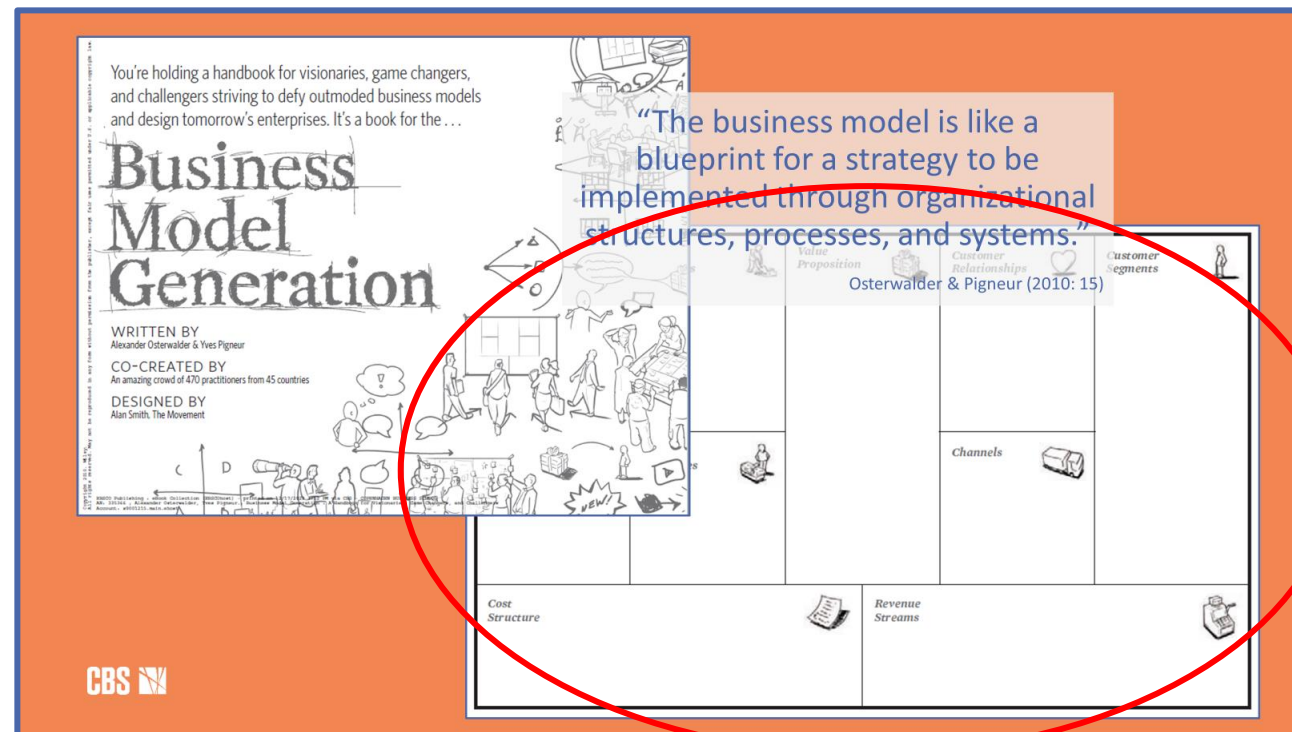

Ingen one-size-fits-all, men særlig fem strategiske situationer nødvendiggør en egentlig ny forretningsmodel:

1. "The opportunity to address through disruptive innovation the needs of large groups of potential customers who are shut out of a market entirely..."
2. "The opportunity to capitalize on a brand-new technology by wrapping a new business model around it (...) or the opportunity to leverage a tested technology by bringing it to a whole new market..."
3. "The opportunity to bring a job-to-be-done focus where one does not yet exist."
4. "The need to fend off low-end disrupters."
5. "The need to respond to a shifting basis of competition."

BETYDNINGEN AF DIGITAL TRANSFORMATION FOR RESSOURCER OG PROCESSER

Kan I huske lektion 3 ang. 'business model canvas'?

5. AFSLUTNING

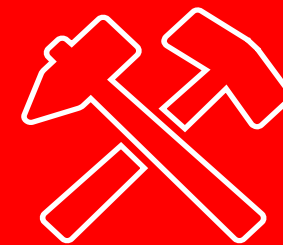

OPSAMLING

1. Vi skelner mellem 'IT-enabled organisational transformation' og 'Digital transformation'.
2. 'Digital transformation' er en stor mundfuld på flere parametre, og indebærer væsentlige ændringer i virksomhedens 'value proposition' og organisatorisk identitet.
 - Virksomhedens forandringer i anvendelsen af digital teknologi redefinerer dens 'value proposition'.
3. Opnåelse af strategiske fordele baseret på AI kræver en omfattende indsats med fokus på "contextualizing AI's agency", som i form minder om "digital transformation"
4. Digitale transformationer har betydning for virksomhedens ressourcer og processer (jf. 'business model canvas') og øger omfanget af implementering.
5. Vi forudsætter – men kan ikke være sikre på – at digitale transformationer på sigt øger virksomheders profitabilitet.

Kort introduktion til tankerne i dag på
<https://youtube.com/watch?v=ewYBZ1HnOMw>

HUSK ØVELSER FREDAG KL. 8:00!

Øvelser

SAXO
BE INVESTED

- Arbejde med centrale pointer og modeller fra i dag.
- Introduktion til obligatorisk mini-case (deadline 11. marts).
- Og meget mere 😊.
