

IT-STRATEGI

Lektion 9: Opsummering og eksamensforberedelse

21. april, 2026

<https://www.vhv.rs/>

I FREDAGS: HVAD LÆRTE VI AF CASE COMPETITION?

CASE COMPETITION ER IKKE LIG EKSAMEN

- 1 Læs og besvar hele opgaven – ”gå ind i casen”
- 2 Forhold jer kritisk til jeres egen besvarelse
- 3 Tydelig og konkret på eksisterende og nye value propositions
- 4 Overvej det store billede: Branche-trends, konkurrenter, nye aktører mv.
- 5 Overvej ‘dynamiske effekter’: Hvordan vil kunder, konkurrenter og andre reagere, og hvordan kan case-virksomheden så reagere?
- 6 Tænk ud over ‘ja/nej-scenarier’, og vær tydelige i jeres anbefalinger
- 7 Overvej hvad de teoretiske modeller kan og ikke kan, og hvordan der kan bygges bro imellem dem.

PS: Stort tillykke til Ella Marie Jørgensen og Peter Find

LEKTIONER

Lektion	Underviser	Øvelse
1. Introduktion til kurset	Ulrik R & Sebastian W	Nej
2. Strategisk analyse (del I) og typiske strategiske virkemidler	Sebastian W	Ja
3. Strategisk analyse (del II) og digitale forretningsmodeller	Ulrik R	Ja
4. Strategi og digital transformation	Ulrik R	Ja
5. Digital innovation, disruption og strategier	Sebastian W	Ja
6. Digitale økosystemer	Sebastian W	Ja
7. Implementering af IT-strategier	Ulrik R	Ja
8. 'Case competition'	Ulrik R m.fl.	Ja
9. Opsummering og eksamensforberedelse	Ulrik R & Sebastian W	Nej

LÆRINGSMÅL

Weber & Poulsens
Bogbinderi

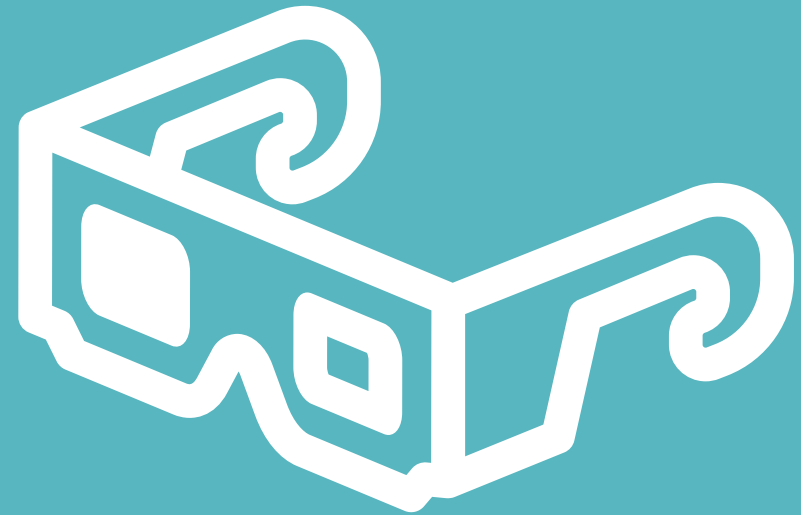

Flügger

- Redegøre for grundlæggende IT-strategiske modeller og begreber
- Beskrive og forklare relevante IT-strategier, der kan udnyttes i forskellige organisatoriske sammenhænge
 - Identificere og reflektere over relevante koncepter/modeller til at analysere udfordringer og muligheder for IT i en given organisation
- Anvende kursets centrale begreber og modeller meningsfuldt og reflekteret på cases og konkrete eksempler.

...OG HVAD KAN VI SÅ BRUGE DET TIL?

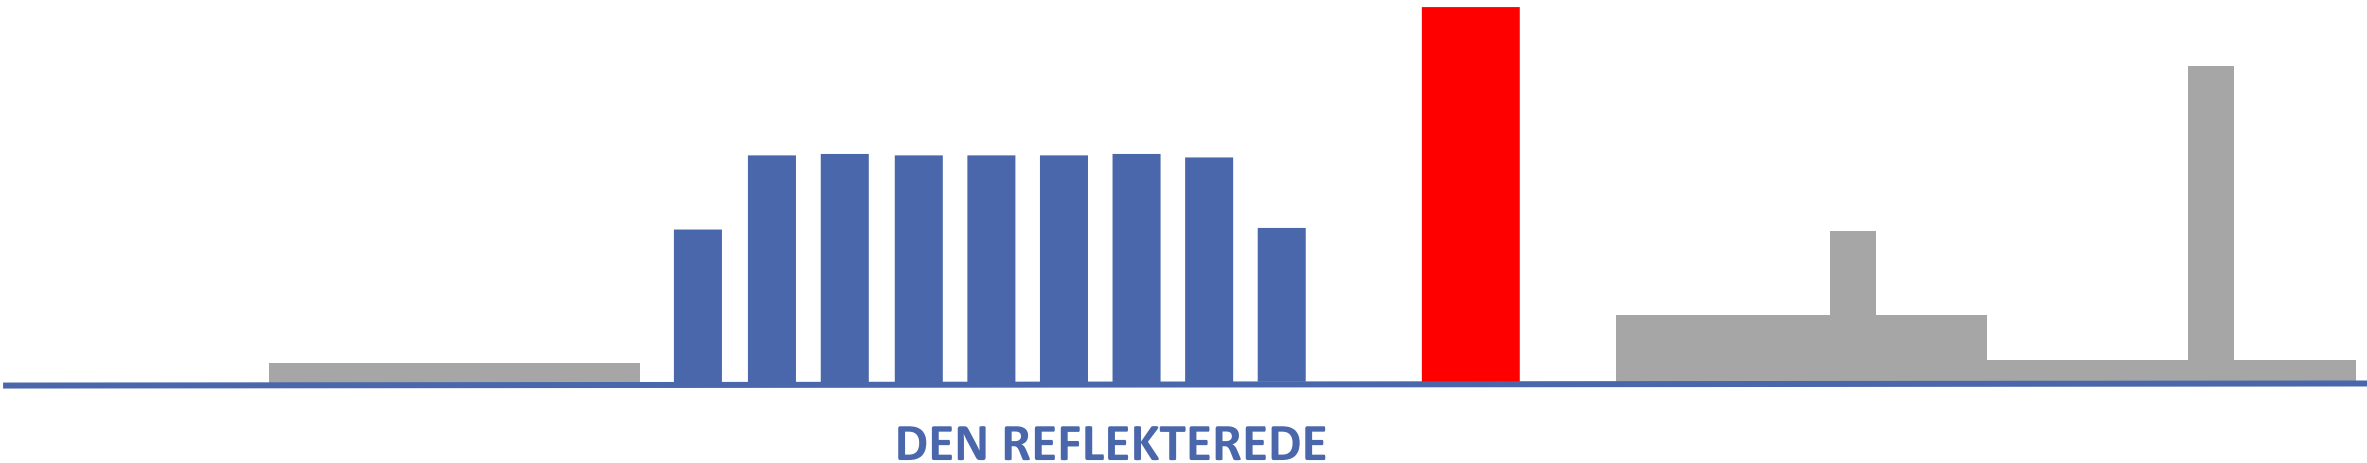

- Teoretisk ramme og baggrund for bachelor- og kandidatuddannelserne
- Kontekst for andre kurser
- Teoretisk fundament for bacheloropgave mv.
- Kompetencer til arbejdslivet:
 - Foretage strategiske analyse
 - Formulere en strategi
 - Udmønte en strategi
 - Aflæse konkurrenters strategi(er)

Et særligt perspektiv på menneskers og organisationers handlinger

SIDSTE PRÆDIKEN FRA ULRIK ☺

TO FORSKELLIGE SYN PÅ ET FAG

DE NÆSTE Knap 100 MINUTTER...

LEKTION 9: OPSUMMERING OG EKSAMENSFORBEREDELSE

1. Introduktion

2. Opsummering

3. Evaluering

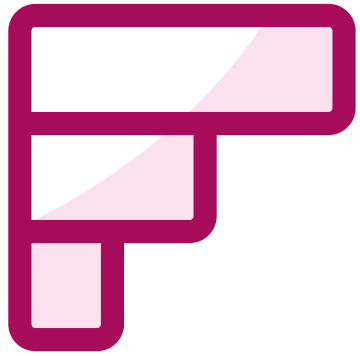

4. Eksamensforberedelse

2. OPSUMMERING

**1. HVILKET 'REAL-LIFE' SPØRGSMÅL FRA
KURSET ER MEST INTERESSANT?**

**2. HVILKEN TEORI, BEGREB(ER) MV. KAN
TILNÆRMELSESVIST BRUGES TIL AT
BELYSE DIT 'REAL-LIFE' SPØRGSMÅL?**

Hvad skal vi særlig fokusere på i dag?

LEKTION 1: HVAD ER STRATEGI OG HVILKE ANTAGELSER LIGGER BAG?

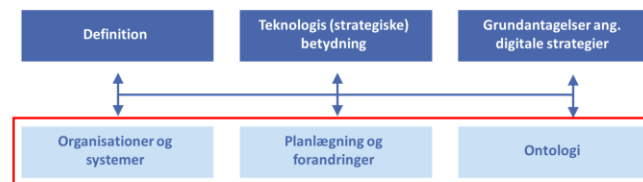

KOMMERCIELLE STRATEGIER

Porter (1996): What Is Strategy?

- “Operational effectiveness (OE) means performing similar activities better than rivals perform them.”
- “OE competition shifts the productivity frontier outward, effectively raising the bar for everyone. But although such competition produces absolute improvement in operational effectiveness, it leads to relative improvement for no one.”
- “In contrast, strategic positioning means performing *different* activities from rivals' or performing similar activities in *different ways*.”
- “Competitive strategy is about being different. It means deliberately choosing a different set of activities to deliver a unique mix of value.”
- Strategic positions emerge from three distinct but overlapping sources:
 1. Variety-based positioning
 2. Needs-based positioning
 3. Access-based positioning

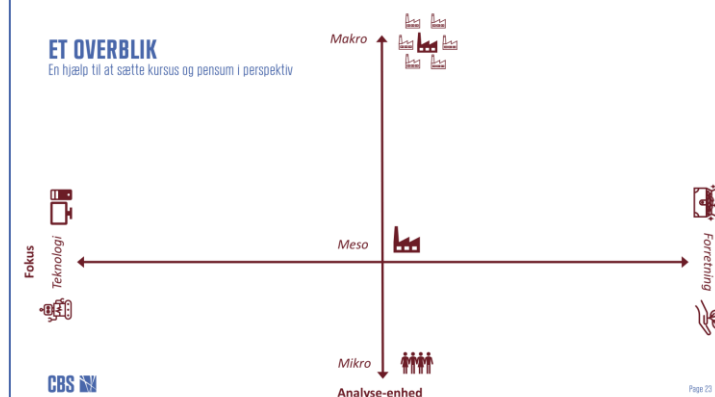

GENNEMGÅENDE TEMAER

Introduktion til kursets "kontekst"

ET OVERBLIK

En hjælp til at sætte kursus og pensum i perspektiv

LEKTION 2: STRATEGISK ANALYSE (DEL I) OG TYPISKE STRATEGISKE VIRKEMIDLER

STRATEGISKE VÆRKTØJER – HVORFOR OG HVILKE?

- 5 minutter med sidemakkeren / bordet rundt
- Et hav af værktøjer – vi når langt fra alle
- Strategi => Gætværk vs. kvalificeret gætværk
- Planlægger fordi vi ikke kan
- Værktøjer og modeller giver struktur og hjælper med kvalificering
- Modeller er forsimplinger af virkeligheden => risici, men det er uundgåeligt

CBS

Forskellige niveauer

- Strategi beskæftiger sig med forskellige lag af virkeligheden (og de potentielle virkeligheder)
- Vi fokuserer på organisationer i bred forstand
- Der er et gensidigt påvirkningsforhold mellem lagene.

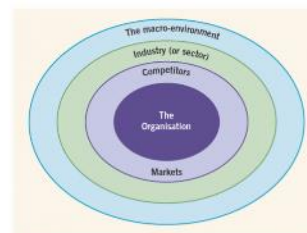

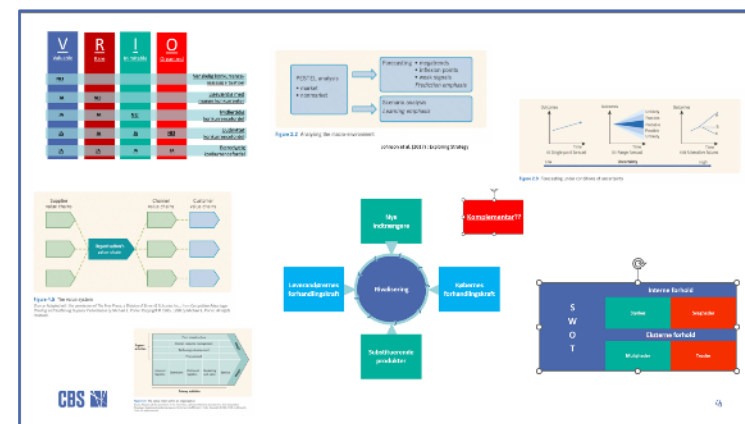

Figure 2.1 Layers of the business environment

Johansen et al. (2017) i: Engineering Strategy

Page 6

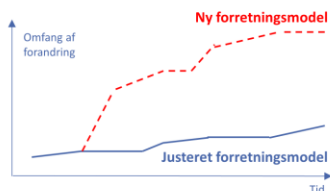

LEKTION 3: STRATEGISK ANALYSE (DEL II) OG DIGITALE FORRETNINGSMODELLER

HVORNÅR BØR DER TÆNKES NYT?

Johnson et al. (2008): 'Reinventing your business model'

Ingen one-size-fits-all, men særlig fem strategiske situationer nødvendiggør en egentlig **ny** forretningsmodel:

1. "The opportunity to address through disruptive innovation the needs of large groups of potential customers who are shut out of a market entirely..."
2. "The opportunity to capitalize on a brand-new technology by wrapping a new business model around it (...) or the opportunity to leverage a tested technology by bringing it to a whole new market..."
3. "The opportunity to bring a job-to-be-done focus where one does not yet exist."
4. "The need to fend off low-end disrupters."
5. "The need to respond to a shifting basis of competition."

FIRE DIGITALE FORRETNINGSMODELLER

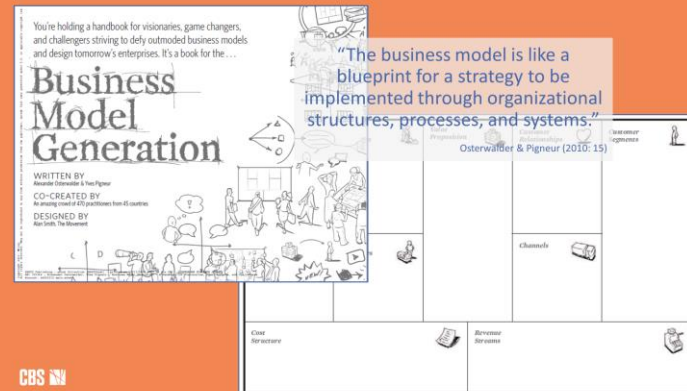

Weil & Woerner (2018: 8): Digital Business Model Framework

"...[D]igitization is compelling companies to move their business models on two dimensions":

1. "...from controlled value chains to more-complex, networked systems."
2. "...from less familiarity with customer needs and life events to a better, closer understanding of them, resulting in better customer engagement."

"Hvor meget ved virksomheden om dens kunder og hvor meget kan den komme til at vide?"

LEKTION 4: STRATEGI OG DIGITAL TRANSFORMATION

CBS

EGENTLIG DIGITAL TRANSFORMATION ER EN STOR MUNDFULD

Wessel et al. (2021) : 'Unpacking the Difference between Digital Transformation and IT-Enabled Organizational Transformation'

▪ "In [digital transformations], digital technology is central to redefining value propositions, which leads to the emergence of a new organizational identity."

FORRETNINGSMODELLEN ER FUNDAMENTET FOR VIRKSOMHEDENS STRATEGISKE POSITION

Knowledge of your and customer Know the identity, products history with your customer, and customer goals	Omnichannel • "Own" the customer relationship • Create individual customer experience to address life events • Customer chooses channels • Integrated value chain Steno, retail, energy companies	Ecosystem driver • Become the destination in your space • Add complementary and possibly competing products • Create great customer experience • Obtain customer data from all interactions • Match customer needs with providers • "Extend" "reach" Amazon, Fidelity, WhatsApp
	Supplier • Sell through other enterprises • Pioneered by loss of power • Low entry, low cost products • Incremental innovation • Resilience via agents, TV via retailers • Instant food via delivery Walmart, McDonald	Modular producer • Plug and play production • Able to adapt to new requirements • Constant innovation of production PayPer, Kebabgig

Business design
Who controls key decisions like brand, contracts, price, quality, partnership, IP and data ownership, regulation

Wess & Woerner (2018: 45)

CBS

Digital Transformation

"[D]igital technology is central to redefining value propositions, which leads to the emergence of a new organizational identity"

"...we suggest that, while there are similarities and nuanced differences in terms of transformation agendas and driving forces, the key differentiator [...] lies in how digital technology, value propositions, and organization identity interrelate in these respective processes."

Wessel et al. (2021: 103)

IT-Enabled Organisational Transformation

"...the use of digital technology to support and reinforce an existing value proposition and identity."

DET STORE BILLEDE

Wessel et al. (2021): Unpacking the Difference between Digital Transformation and IT-Enabled Organizational Transformation'

The diagram illustrates the process of organizational transformation. It starts with 'Technological Change' (Environmental and Organizational Context) which 'drives' the 'Transformation Agenda'. The agenda involves 'Existing Organizational Identity' and 'New Identity Claim'. This leads to 'Transformation Activity', which includes 'Digital Technology' supporting a 'Value Proposition'. This activity 'refines' and 'imposes' changes, leading to 'Imposition & Reconciliation' (Reconciliation Action and Work Practice Change). The final outcome is the 'Emergence of' 'New Organizational Identity' or 'Reinforced Organizational Identity'. A legend indicates that dashed lines represent Digital Transformation, solid lines represent IT-enabled Organizational Transformation, and arrows with a dot represent both.

CBS

LEKTION 5: DIGITAL INNOVATION, DISRUPTION OG STRATEGIER

Digital Disruption

- Disruptiveness
- Marked
- Relativitet
- Forandring / Impact ift. tid
- Digitalness
- Data homogenitet
- Redigerbare
- Selvrefererende egenskaber

“A profound alteration in a prevailing paradigm of a domain due to the digital attributes of an innovation.

Baiyere, A., & Hukal, P. (2020).

Innovationstyper

IT Doesn't Matter

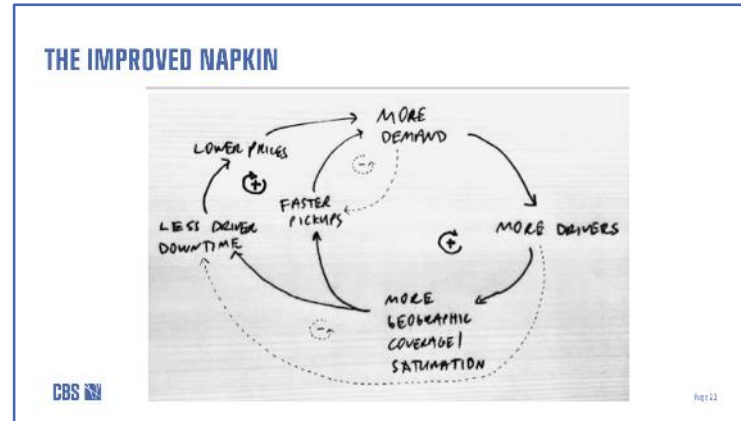

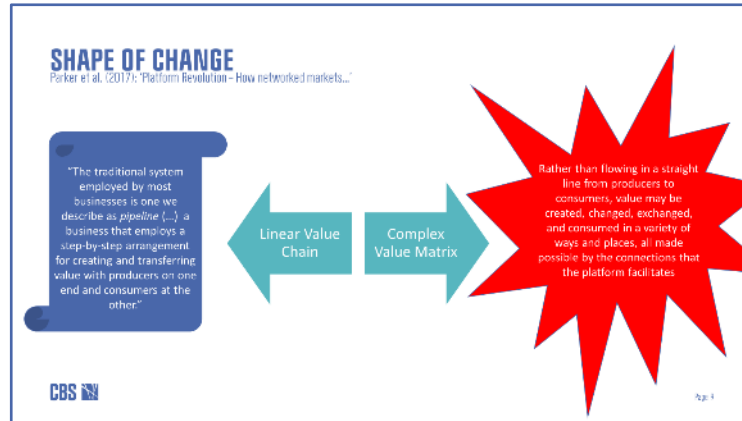

Carr (2003)

Studies of corporate IT spending consistently show that greater expenditures rarely translate into superior financial results. In fact, the opposite is usually true.

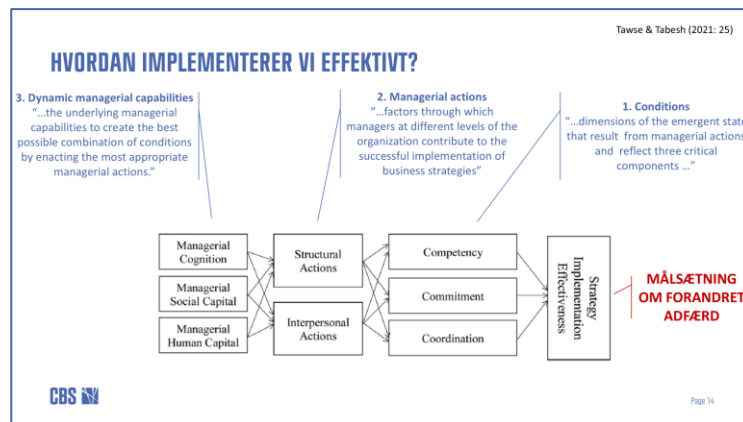

When a resource becomes essential to competition but inconsequential to strategy, the risks it creates become more important than the advantages it provides.

IT som commodity
Cloud vs. OnPremise
Hvad med AI?

LEKTION 6: DIGITALE ÖKOSYSTEMER

LEKTION 7: IMPLEMENTERING AF (IT-)STRATEGIER

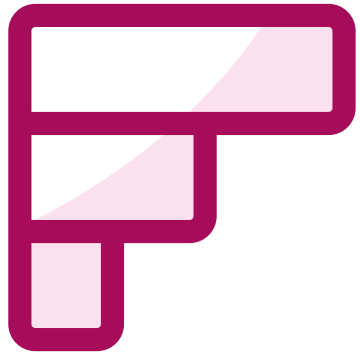

HVORDAN INDSAMLES OG ANVENDES FEEDBACK?

- Implementeringsprocesser giver behov for løbende feedback...
 - ...og justeringer i implementering...
 - ...og eventuelt i strategien
- Afhængig af tilgang lægges der typisk vægt på:
 - (Kvantitative) 'key performance indicators' (KPI)
 - (Kvalitativ) organisatorisk læring
- Tilsvarende forskel i hvem feedbacken primært er tiltænkt:
 - Topledelsen
 - Organisationen

Hvad skal vi særlig fokusere på i dag?

3. EVALUERING

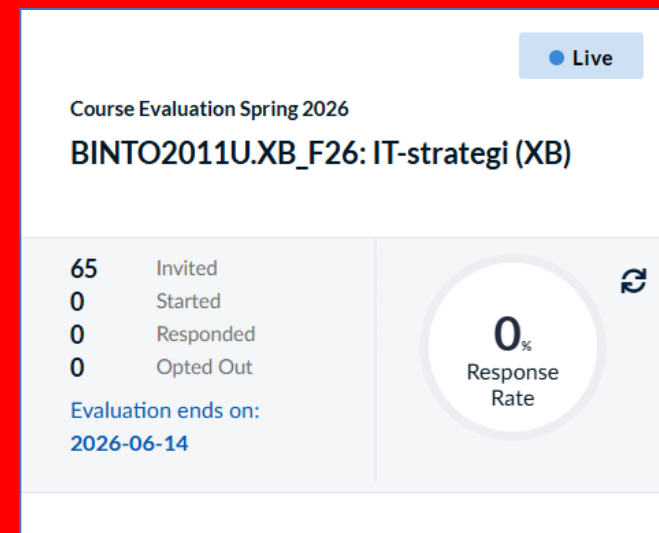

HJÆLP DE KOMMENDE GENERATIONER!

EVALUERING

Find evalueringen på
<https://survey.cbs.dk>

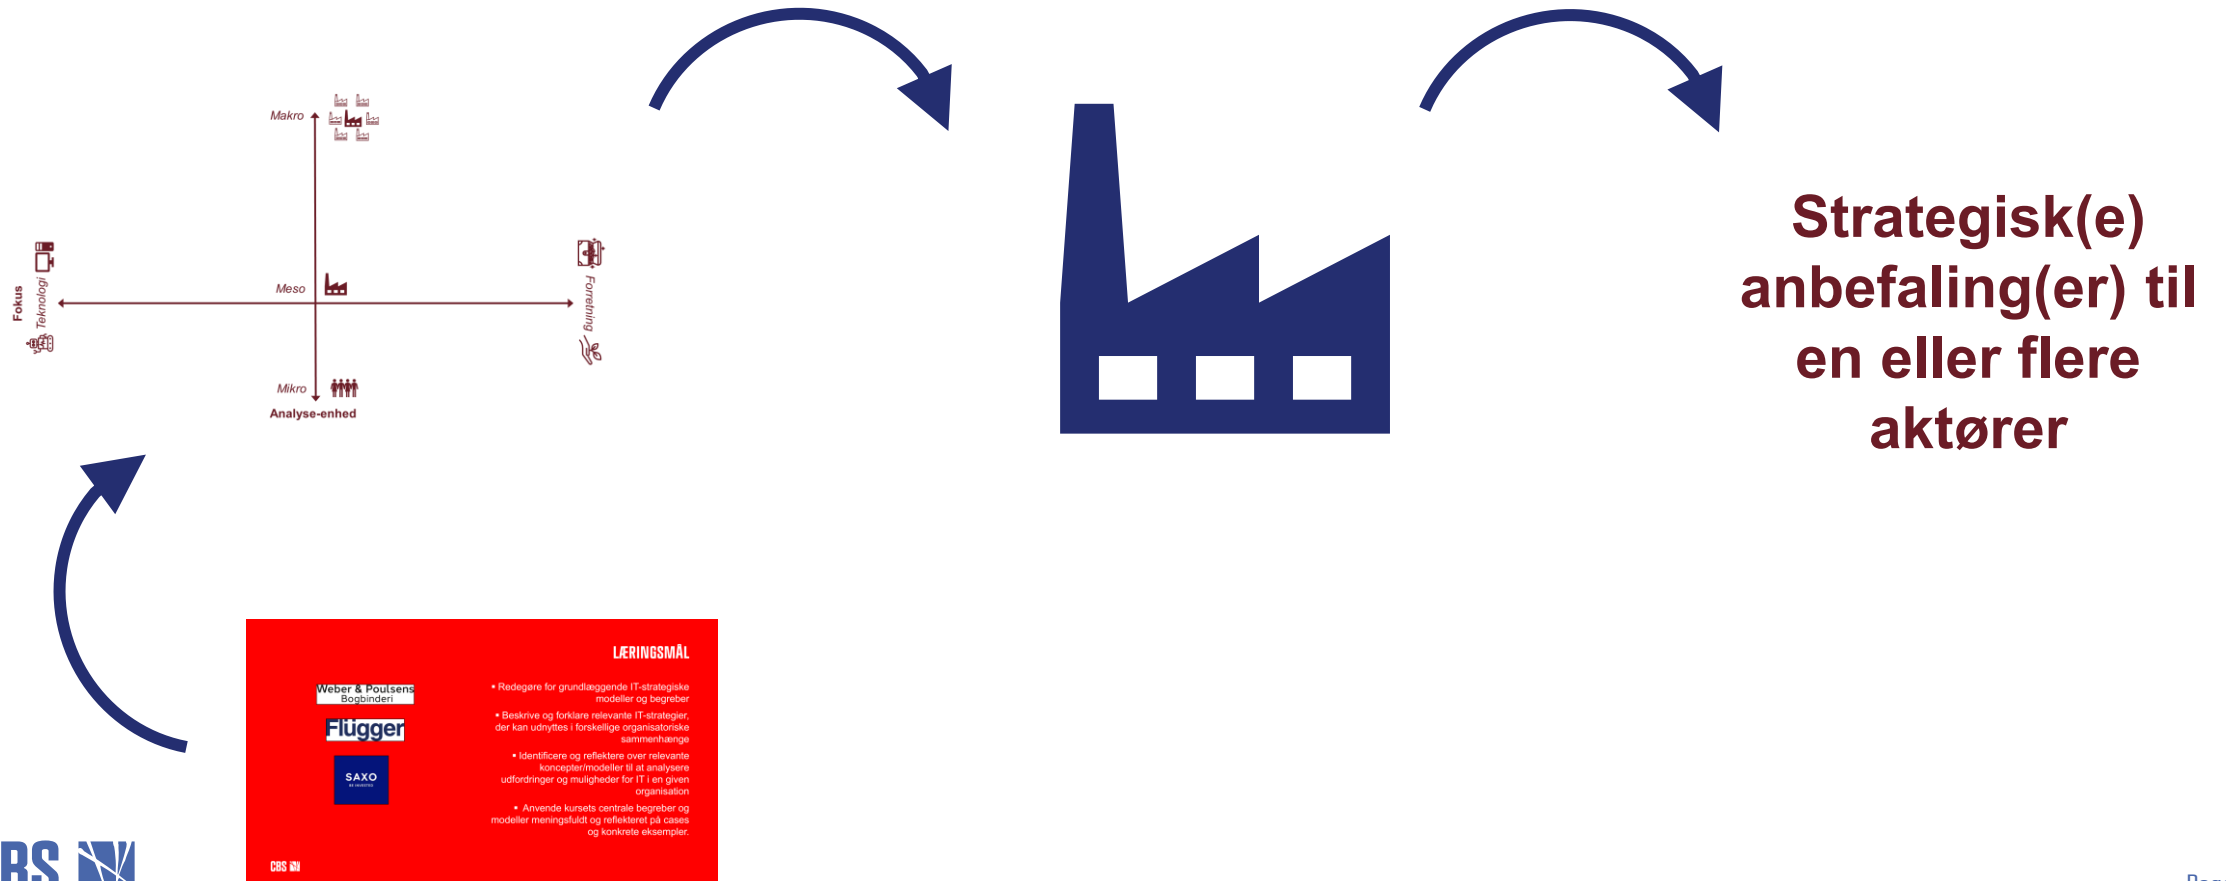

<https://jasperfoto.dk/>

4. EKSAMENSFORBEREDELSE

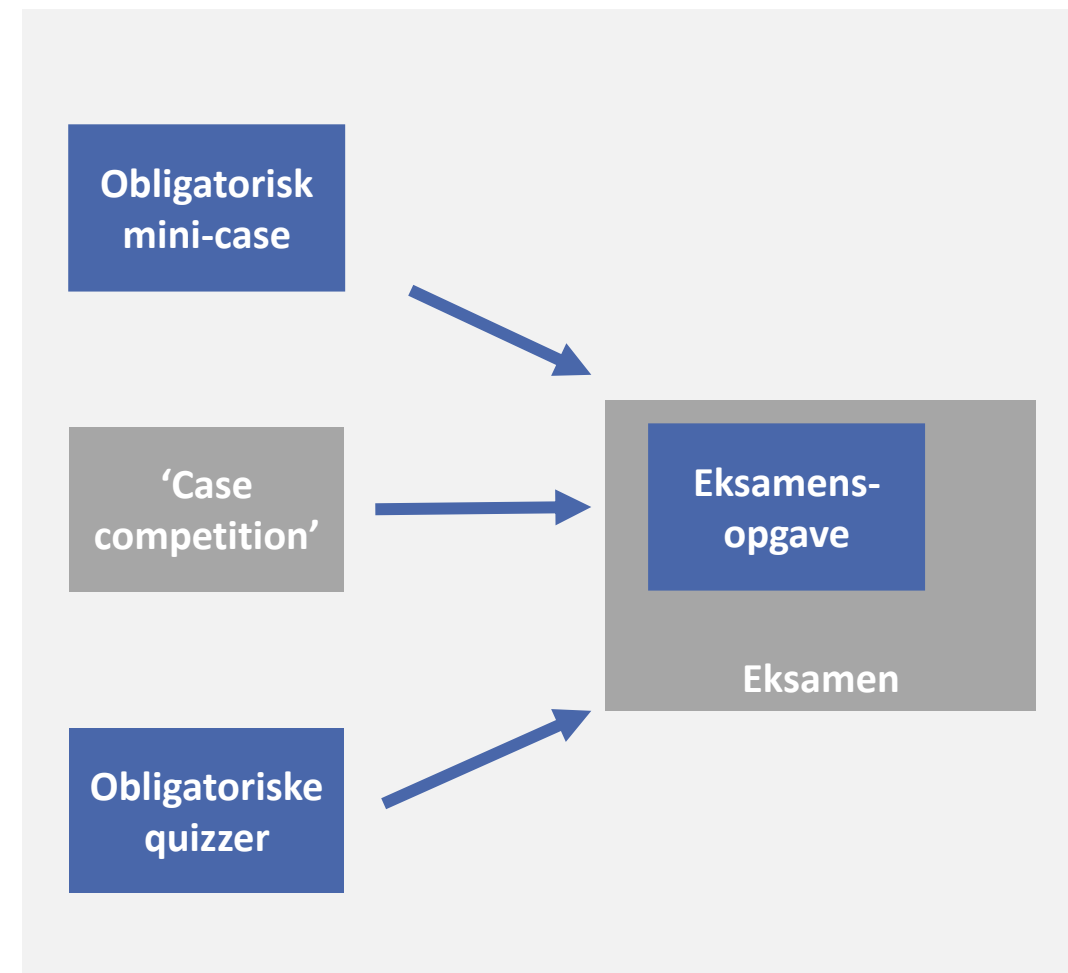

DEN RØDE TRÅD

Fra læringsmål via undervisning og øvelser til eksamen

OPGAVER OG EKSAMEN

- **Fem obligatoriske opgaver**
 - To mini-cases (gruppe) og 3 multiple choice-quizzzer (individuel)
 - Anvend quizzzer som indikation på egen indsats – anvend cases som forberedelse til eksamen
 - Tre opgaver er forudsætning for eksamen.
- **Eksamen**
 - Mundtlig prøve i grupper på baggrund af skriftlig opgave.
 - Opgave baseres på strategisk analyse af case med henblik på formulering af anbefalinger (maks. 15 sider)
 - Individuel helhedsbedømmelse på baggrund af opgave og mundtlig præstation
 - Skriftlig opgave forventes frigivet 24. april og skal forventeligt afleveres 15. maj. Eksamen forventes afholdt fra 15. –26. juni.
 - Formalia i [kursuskataloget](#).

DEN SKRIFTLIGE OPGAVE

▪ Casen

- Forvent 5-25 sider på dansk eller engelsk om en virksomhed for hvem digitale muligheder er centrale.
- Virksomheden står i en strategisk interessant situation: Ændrede kundebehov, ændret konkurrencesituation, nye teknologiske muligheder mv.

▪ Opgaven

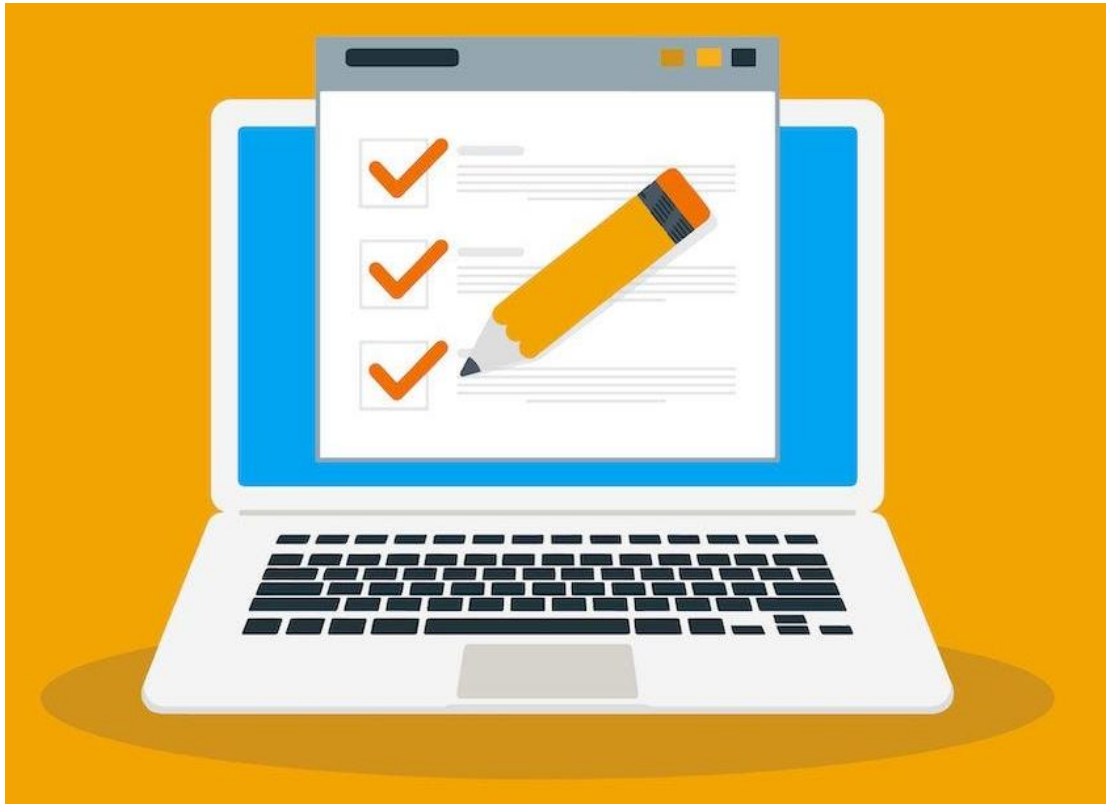

- Jeres opgave er at vise, at I kan anvende teori, begreber mv. meningsfuldt og detaljeret i relation til en virkelig case i forlængelse af fagets læringsmål.
- Anvend 1-2 selvvalgte perspektiver (teori, begreber mv.) fra undervisningen til at analysere casen.
- Anvend perspektiverne til at formulere strategiske råd til en aktør i casen.

▪ (Gode) råd

- Argumentér struktureret for jeres tanker via i) påstand, ii) begrundelse og iii) empiriske observationer.
- Vær præcise og omhyggelige (😊).
- Prioriter dybde fremfor bredde..
- Anvend en traditionel opbygning, hvor I præsenterer casen, valgte perspektiver, analytiske resultater og strategiske anbefalinger.
- Behandl' enten perspektiverne hver for sig; eller 'sammenvævet'.
- Begrund jeres valg af perspektiv(er).
- Stå ved eventuel tvivl og diskuter åbenlys kritik af jeres tanker.
- Angiv referencer og indsæt kildeliste (for både case og teori), og anvend et systematisk system (fx APA 7).
- Ta' ejerskab til eventuel anvendelse af generativ AI (Microsoft Copilot osv.) og følg CBS' regler.

INFORMAL QUALITY CRITERIA FOR EXAM PAPERS

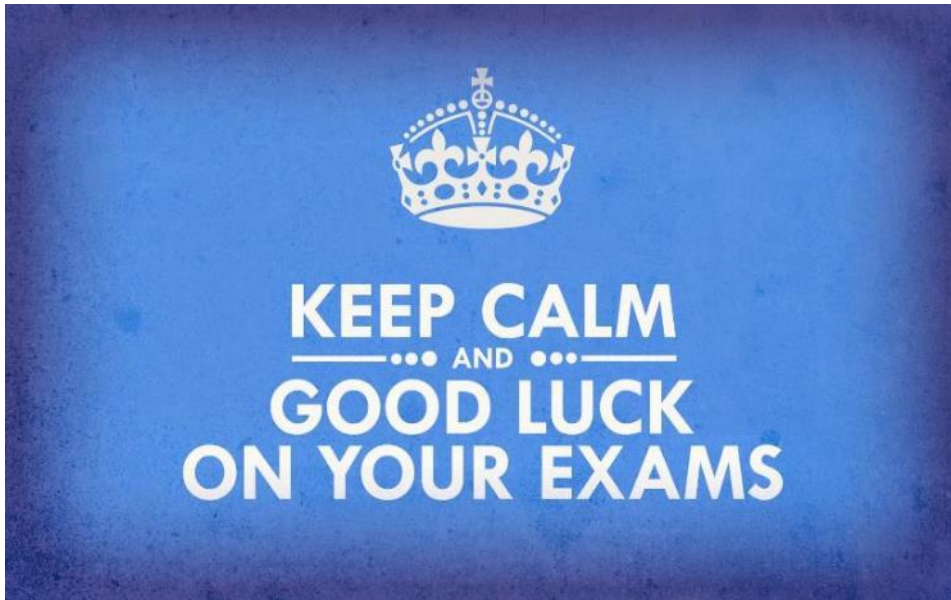

Rienecker & Jørgensen (ed.), 2022

[www. medium.com](https://www.medium.com)

- ☐ It shows that the author masters the learning objectives of the course.
- ☐ It presents the author(s) as an independent, authoritative voice on the topic.
- ☐ It employs relevant material, concepts or theoretical frameworks from the course.
- ☐ It has a clear focus including relevant limitations.
- ☐ It contains one, overall, convincing argument.
- ☐ It is critical in its approach (e.g., discusses advantages and limitations in the analysis).
- ☐ It illustrates the student is able not only to present and explain, but also to apply, discuss and reflect.
- ☐ It contains a certain element of “meta communication” (e.g., what happens next).

EKSAMEN

<https://tourolawoss.blogspot.com>

- **Form**
 - Gruppeeksamen – ca. 20 minutter pr. studerende inkl. votering.
 - 2-4 personer i gruppen.
 - Ta' navneskilte med (beklager ☹).
 - Intern censur
 - Udgangspunkt i skriftlig opgave, men omfatter hele pensum.
 - Omtrentlig opbygning:
 - 4-5 minutters oplæg ang. selvvalgt emner fra skriftlig opgave.
 - Spørgsmål til, og diskussion af, emner fra skriftlig opgave.
 - Spørgsmål til, og diskussion af, emner fra øvrigt pensum.
- **Bedømmelse**
 - Vi bedømmer jer på opfyldelsen af læringsmål og anvendelse af pensum:
 - Ikke mere, ikke mindre!

ONE WAY OF STRUCTURING YOUR MAIN ARGUMENT

Booth et al., 2016

- A **claim** is an assertion of something that demands support:
 - E.g., agile organisations more successfully undertake software development than non-agile organisation.
- A **reason** is an assertion that supports a claim:
 - E.g., agile organisations respond faster and more cost-effective respond to changes in user needs.
- **Evidence** is data deployed to support a reason:
 - E.g., the case in question illustrates agile organisations' ability to respond faster and more cost-effective as data shows that...
- Be careful of pretending your claim is absolute:
 - What are likely **objections** to your argument and what is your **response**?
 - Are there any necessary **warrants** that modify your argument thereby making it more precise and convincing?

LIDT GODE RÅD OM ANVENDELSE AF GENERATIV AI

“[T]he ability to use a tool like Bing or ChatGPT in a professional context is a skill that must be learned and understood. This is no different from the way understanding how to use computers became a tool in the 80s and 90s for office workers. But since there is no consolidated knowledge about how to use it, not standards for integration into workflows, no best-practice guidance in any way, and - perhaps most importantly – that you can use the tools as an individual immediately and in a meaningful way, *it is necessary for all of us to develop some ideas about how to use AI productively.*”

Hendriksen, C. (2023). ChatGPT and Bing: A practical guide for Social Science and Management Studies. Google Docs

- I har ansvaret:
 - Ta’ ejerskab til jeres opgave og vær skeptisk over for AI-genereret information.
 - Overvej alle anbefalinger grundigt.
 - Dobbelt-check alt information, faktuel viden mv.
 - ”There is no free lunch”!
- Glem ikke almindelig god praksis:
 - Vær gennemsigtig i jeres anvendelse.
 - Overvej ‘prompts’ omhyggeligt.
 - Anvend altid kildehenvisninger, hvor relevant (tekst genereret via AI er ikke din egen tekst)
 - Vær opmærksom på eksamens-regler og undgå snyd og plagiat-problemer – der ér ingen kære mor 😞.

PS: Ét AI-prompt bruger energi omtrentlig svarende til en elpære i én time.
